Market Outlook - Equity

As Calendar Year (CY) 2024 wraps up, Indian markets have once again celebrated a year of gains, marking a historic milestone with nine consecutive years of positive returns. The Nifty declined 2% in the month of December 2024 but gained 8.8% in calendar year (CY) 2024. On a full-year basis; NIFTY Midcap 150 was up 24%; while NIFTY Smallcap 250 index was up 26%. Sector-wise, healthcare and realty were the best-performing sectors in the month of December 2024 and in the year 2024. Power, metals and PSU indices declined 7%, 5.4% and 5.2% in December. Despite Foreign institutional investor (FII) selloffs causing market jitters, strong domestic liquidity has dominated flows into the Indian equity market, reducing volatility. Foreign portfolio investor (FPIs) sold equity worth USD 130mn during Calendar Year (CY) 2024, while Domestic institutional investor(DIIs) bought equity worth USD 62bn during the same time.

US presidential election and India's Lok Sabha election played a pivotal role in driving the markets through the year. Global markets ended on a mixed note for the month. Japan (+4.4%), Taiwan (+3.5%) and Hong Kong (+3.3%) were the major gainers, whereas the US Dow Jones, Brazil and US S&P 500 declined 5.2%, 4.3% and 2.4%, respectively. The US Fed cut the interest rate by 25 bps and indicated fewer rate cuts next year. US Nov'24 payroll data was better although unemployment moved up; Consumer confidence is at a sixteen-month high; strong retail sales underline robust consumer spending.

On the domestic front, following a strong FY 2024, 1st Half of the Financial Year 24-25 i.e. (April 2024-September 2024) experienced a slowdown in key macroeconomic indicators. Real GDP growth fell to 5.4% YoY in Q2 FY25, down from 8.2% YoY in FY24, due to lower government spending and reduced consumption. Total capital spending of the Central Government is down 13.5% YoY in 1 Half Financial Year 25, achieving only 39.1% of budget estimate in 1st Half of the Financial Year 24-25 i.e. (April 2024-September 2024)(vs. 50% each in the last two years), partly due to code of conduct. Consequently, consumption and earnings took a hit during 2Q FY25.

Economic activity has picked up in the Oct-Dec 2024 period. Index of Industrial Production (IIP) growth in October improved marginally to 3.5% yoy from 3.1% in September 2024. The output of eight core industries' rose 4.3% YoY in November vs 3.7% in October, the highest pace in four months, primarily due to an uptick in production of coal, cement and steel. November 2024 Consumer Price Index (CPI) inflation decelerated to 5.5% YoY from 6.2% in October 2024. Wholesale Price Index (WPI) inflation eased to 1.9% in November 2024 compared to 2.4% in October 2024.

Consumption is seeing some revival. India's domestic air pax growth jumped to 12% YoY in Nov-24. Dec 2024 dispatches in car and CV segments were ahead of expectations while the performance in the two-wheeler segment disappointed. Vahan retail sales in Dec 2024 indicated a mixed YoY growth trend as tractors recorded sharp double-digit growth, Private Vehicle grew in high single digit while two-wheeler declined by high teens YoY. GST collections reached Rs.1.77 lakh crore in December 2024, marking the tenth consecutive month above the Rs. 1.7 lakh crore level. This figure reflects a 7.3% increase from Rs. 1.65 lakh crore in December 2023.

Despite global challenges, India continues to be the fastest-growing economy among major nations, reflecting its resilience. It has been a volatile market amidst Indian elections, escalating geo-political tensions, a new regime in the US, and a weak 1st Half of the Financial Year 24-25 i.e. (April 2024-September 2024)) earnings including Q2 being not so encouraging. Current quarter, the signals so far are mixed.

Nifty is trading at 1-year forward PE of 19.5x. In the coming year, the emphasis will be on evaluating the effects of Donald Trump's policies particularly potential tariff increases, on international commerce in the coming year. The market expects demand will revive in the fourth quarter. A busy marriage season, a good Rabi crop (due to high reservoir level) should help consumer demand. All hopes lie on Feb 2025 budget to boost consumption & GDP.

Market Outlook - Fixed Income

Global Economy -

Global economic activity has remained resilient and steady. The global composite Purchasing Managers' Index (PMI) rose to a three-month high in November, recording growth for the thirteenth consecutive month. The acceleration was largely driven by the services sector, which remained in the expansion zone for the twenty-second consecutive month.

Supporting the same, advanced economies' central banks like the US Federal Reserve decided to lower the target range for the federal funds rate by 25 bps to 4.25-4.50% on December 18, 2024 and indicated that the extent and timing of further adjustments to the target range for the federal funds rate will be based on a careful assessment of the incoming data and the evolving outlook.

The major mover remained the economic projections which saw revisions compared to the Sep-2024 economic projections. The market took the economic projections as hawkish.

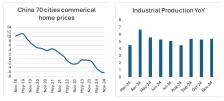

This comes after the headline inflation in the United States accelerated for the second consecutive month. US CPI was up 2.7% in November from a year earlier. This was up from 2.6% in October and 2.5% in September 2024. The acceleration reflected an increase in energy prices (which previously had been declining) and an acceleration in food prices.

Source: Federal Reserve Summary of Economic Projections Dec-2024

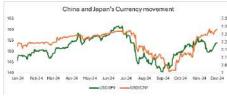

Following the FED's decision, global financial markets are emitting mixed signals. Equity markets remained volatile, whereas bond yields have risen on the prospect of larger US fiscal imbalances and an anticipated slowdown in the pace of monetary easing. In the December policy, Bank of England (BOE) left its benchmark interest rate unchanged. The majority expressed concern that accelerating wages and prices added to the risk of inflation persistence. The decision means that the BOE is focused more on inflation than on economic growth.

Global commodity prices recorded divergent movements as gains in energy and agricultural commodity prices were offset by the decline in metal prices. Overall, the commodity prices have been driven down during much of 2024, reflecting a fall in global oil consumption with the declining energy intensity of global GDP.

Source: Bloomberg, Latest data as on Dec-2024

In Asia, the weakness in China's economy persists. China's government has signalled an intention to provide fiscal stimulus meant to boost domestic demand. This is expected to keep pressure on Yuan and other emerging market economies. The pressure on emerging market economies intensify as dollar index gains strength backed by strong growth signals.

Jan-24 Feb-24 Mar-24 Apr-24 May-24 Jun-24 Jul-24 Aug-24 Sep-24 Oct-24 Nov-24 Dec

Source: Bloomberg, Data as on December 16th, 2024

The dollar index remained above 108, remaining near its highest levels in two years as investors bet on US economic strength and fewer Federal Reserve rate cuts this year. The dollar index strength has pressured other emerging market and Asian currencies. Japan too has a dual problem of rising inflation and yields and depreciating currency given strong dollar index. Unless an action is taken by Bank of Japan(BOJ), yen is expected to remain under pressure.

Domestic Economy -

In December-2024'sRBI monetary policy, the focus has been on balancing the domestic growth and inflation dynamics while managing the liquidity conditions in the background of currency volatility. RBI kept the reporate unchanged at 6.5% (with a vote of 4.2). The MPC also decided to continue with the neutral stance on unanimous basis. The key decision was the Cash Reserve Ratio (CRR) cut of 50bps from 4.5% to 4%. To ease the potential liquidity stress, RBI decided to reduce the cash reserve ratio (CRR) of all banks to 4.0% of Net Demand and Time Liabilities (NDTL) in two equal tranches of 25 bps each with effect from the fortnight beginning December 14, 2024 and December 28, 2024.

This will restore the CRR to 4.0% of NDTL, which was prevailing before the commencement of the policy tightening cycle in April 2022. The move is expected to infuse liquidity boost of -Rs. 1.16 trn in the banking system. A liquidity decision aligning with the neutral stance.

Revision in Inflation and Growth projections - MPC took note of the recent slowdown in the growth momentum, which also translated into a downward revision in the growth forecast for the current year. RBI has revised down its FY25 GDP projection from 7.2% to now projected 6.6%. RBI has also revised its inflation projections upwards to 4.8% from earlier projected 4.5%. Both the revisions add to the argument for pause in the December-2024 policy and a more data-based approach in the upcoming meetings.

High frequency indicators (HFIs) for the third quarter of 2024- 25 indicate that the Indian economy is recovering from the slowdown in momentum witnessed in Q2, driven by strong festival activity and a sustained upswing in rural demand. The prospects for agriculture and hence rural consumption are looking up with brisk expansion of rabi sowing. On the contrary, India's current account deficit has been facing some challenges led by depreciating INR and net FPI outflows in second half of 2024. The merchandise trade deficit widened to an all-time high of USS 37.8 billion in November 2024. Oil deficit rose to USS 12.4 billion in November-2024 from USS 7.5 billion a year ago. The share of oil deficit in trade deficit, however, fell to 32.8% in November from 35.4% a year ago. Petroleum products were the largest source of the deficit, followed by gold. On the bright side, our services exports remain resilient and a soft-landing scenario for global growth is supportive of our export economy.

Source: Bloomberg, Data as on December 31, 2024

The Centre's fiscal deficit on financial year to date (FYTD) basis remained under check at 52% of FY25BE, with expenditure growth remaining slow. Receipts were at 59% of FY25 budget estimates (BE), while expenditure was at 57% (capital expenditure at 46%) of FY25BE.

As per sectoral credit deployment data for Nov-24, non-food credit growth across segments showed similar trends as compared to Oct-24 with agriculture credit growing at 15.3% y/y in Nov-24 vs. 15.5% y/y in Oct-24; services growing at 13% y/y in Nov-24 vs. 12.7% y/y in Oct-24 Industry credit growth continued to be in single digits at 8% y/y in Nov-24 vs. 7.9% y/y in Oct-24.

Source: MOSPI, Data as on December 31st, 2024

- Inflation moderated in Nov-24 at 5.48% from the high of above 6% in Oct-24 as vegetables inflation witnessed a M-o-M decline of 4.5%.
- A sequential decline of -0.15% M-o-M, after nine months brings a relief.
- Core inflation inched to 3.7% vs 3.5% last month with 0.5% M-o-M.
- We expect inflation to soften further in Q4 FY25 and slowly converse closer to 4.5% in Q4 FY25.

Liquidity and Rates -

Source: Bloombera, Data as on December 31st, 2024

- Liquidity conditions remained tight in December-2024 led by advance tax payments and RBI's intervention in forex markets. The deficit, which crossed Rs. 2 trillion as on December 27, 2024 is down to ~Rs. 1 trillion led by second tranche of CRR cut coming into effect and government spending.
- Going forward, liquidity conditions will be attuned to the extent of government spending and RBI's FX operation in an effort to support rupee.

Fixed Income Outlook -

Global monetary policy dynamics have started witnessing bumps in their path to recalibrate the monetary rates. US FOMC's shift in the forward guidance and the recent pickup in inflation must be carefully monitored.

We believe three key global factors to be watchful of -

- US policy actions by the newly elected government and resultant impact on inflation/growth and employment dynamics.
- The BOJ balancing of consistent inflation and thereby resultant rise in bond yields on one side and depreciating currency versus the dollar.
- The impact of the recently announced fiscal policies by China to support its economy and resultant impact on commodities.
- On the domestic front, Global headwinds are expected to pressure INR which will have spillovers over domestic liquidity. Recent moves by RBI gives us the confidence that liquidity will be managed in spirit of the stance.
- We expect RBI to use different methods of liquidity management to offset any major setback from global headwinds.
- On Growth, the dent of Q2 FY25 on domestic growth cannot be ignored. RBI itself has revised the GDP projection downward for the full year and this assumes greater significance going forward for policy action
- At the same time, inflation has seen significant relief in November-2024, and the forward trajectory also looks optimistic with projected inflation for Q1 FY26 converging to 4%.
- The fundamentals of India's fiscal demand supply continue to remain balanced and that is expected to maintain a downside bias on yield over medium term.

Equity Investment Philosophy -Business, Management, Valuation (B.M.V.)

We believe that "companies create wealth and not markets" and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management - Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with superior and sustainable earnings growth with strong management, at reasonable valuations.

• Superior risk-reward profile

^A sustainable competitive advantage

Īī

Benchmark (Tier 1) Riskometer^

Benchmark riskometer is at Very High risk

^^Riskometer For Scheme: basis it's portfolio, ^Riskometer For Benchmark (Nifty Midcap 150 TRI): basis it's constituents; as on December 31, 2024

INVESTMENT OBJECTIVE

The investment objective of the Scheme seeks to generate long-term capital appreciation by investing primarily in companies with high growth opportunities in the mid capitalization segment. The fund will emphasize on companies that appear to offer opportunities for longterm growth and will be inclined towards companies that are driven by dynamic style of management and entrepreneurial air. However, there can be no assurance that the investment objectives of the Scheme will be realized. The Scheme does not uarantee/indicate any returns

** CARE's fund quality rating is not a recommendation to purchase, sell, or hold a security/ fund. It neither comments on the current market price, suitability for a particular investor nor on the prospective performance of the fund with respect to appreciation, volatility of net asset value (NAV), or yield of the fund. The ratings do not address the funds ability to meet the payment obligations to the investors, compared to the face value during the tenure of the scheme any time before maturity

Past performance may or may not be sustained in future and should not be used as a basis of comparison with other investments. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown.

*% CAGR Returns are computed after accounting for the cash flow by using the XIRR method.

For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to page no. 51. Please note TRI indicates Total Return Index.

Performance of Schemes (as on December 31, 2024)

Returns in INR represents the value of Rs. 10,000 invested at the beginning of 1 year, 3 years, 5 years and since inception.

Past performance may or may not be sustained in future and is not a guarantee of future returns and should not be used as a basis of comparison with other investments. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure.

Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas NIFTY BANK ETF, Baroda BNP Paribas Manufacturing Fund, Baroda BNP Paribas Dividend Yield Fund, Baroda BNP Paribas Nifty 200 Momentum 30 Index Fund & Baroda BNP Paribas Nifty Midcap 150 Index Fund is not provided as the scheme has not completed 6 months.

s Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -21.82% s Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -2.24%

The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous NAV history available for this plan prior to May 10, 2010, the point to point return from since inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception.

* The scheme is a 'Transferee Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/H0/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered.

* Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively.

** Total Return Index: Total Return Index: The total return index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index. Looking at an index's total return displays a more accurate representation of the index's performance. By assuming dividends are reinvested, you effectively account for stocks in an index that do not issue dividends and instead, reinvest their earnings within the underlying company. For example, an investment may show an annual yield of 4% along with an increase in share price of 6%. While the yield is only a partial reflection of the growth experienced, the total return includes both yields and the increased value of the shares to show a growth of 10%.

Difference between total return index & price index: A total return index (TRI) is different from a price index. A price index only considers price movements (capital gains or losses) of the securities that make up the index, while a total return index includes dividends, interest, rights offerings and other distributions realized over a given period of time.

The scheme has been in existence since September 23, 2004. The performance given above is the blended performance of erstwhile BNP Paribas Large Cap Fund and erstwhile Baroda Large Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/H0/IMD/IMD/Pb-Db-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended form Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda Infrastructure Fund to convert it to Baroda Large Cap Fund.

The scheme has been in existence since May 02, 2003. The performance given above is the blended performance of erstwhile BNP Paribas Mid cap Fund and erstwhile Baroda Mid cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/ IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda PSU Equity Fund to convert it to Baroda Mid Cap Fund.

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/ IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website https://www.amfiindia.com/research-information/other-data and https://www.amfiindia.com/importantupdates.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/ agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30. 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor. based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is $\vec{\mathbf{x}}$ 100 and the exit load is 1%, the investor will redeem the fund at $\vec{\mathbf{x}}$ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage Change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market. **AUM:** AUM or assets under management refers to the recent /

updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link https://www.barodabnpparibasmf.in/downloads/totalexpense-ratio-of-mutual-fund-schemes on website of mutual fund

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Currency in circulation (% Yor) Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector Wig (% Yor) Measures money supply and is linked to real GDP growth and inflation Bank non-food credit growth (%Yor) Ionas means supply and is linked to real GDP growth and inflation Personal credit (%Yor) Ionas personal loan, credit to real to the growth and services scatch deans of personal loan, credit to industry (Givor) Credit to services (%Yor) economy, industry demand for credit and services scatch demands for credit and services scatch demands for credit and services scatch demands in the banking system and hence scope J transmission of rate cuss. Orgent Sec yields (%) Growth (%Yor) Weighted average deposit rate of banks (%) Lending rate for new loans. Weighted average deposit rate of banks (%) Lending rate for new loans. Means MCLB (%) Measures volume of cement production of determines the construction component of GDP. Meanne MCLB (%) Measures volume of cement production (IP) measures volume of domssite and and programs. Means MCLB (%) Measures volume of cement production (IP) measures volume of domssite and to production which is (1) reflective for somo more of GDP. Meanse duratio production (% Yor) Measures volume of somo sans an en	Perking	
M3 (K VY) Measures money supply and is linked to real GDP growth and inflation Berskin one-food eredit growth (KVY) Measures total non-food bank credit growth. The Key sub-components are personal credit growth (KV) Credit to industry (GNY) Lanas, personal loan, credit cast sets, credit to industry (Dans for infloration). Credit to industry (GNY) Lanas given to NHSE and service reader induction. Deposit growth (KVY) Measures total deposit growth in the banking system. Credit to diverse (NYY) Measures total deposit growth in the banking system. Credit to diverse deposit rate (SN) G-Secs services (CNY) Weighted average lending rate of Banks (K) Credit deposits reflects credit demand vs. availability to funds in the banking system and hence scope / transmission Credit to deposit rate (SN) Margin lending rate for new Loans. Weighted average lending rate of Banks (K) Margin lending rate for new Loans. Credit to fundstry Margin lending rate for new Loans. Margin (SNY) Measures volume of exernit term funds of corporates via the marker true Also reflective of ease of access to fundstrinduruting. Margin (SNY) Measures volume of exernit term funds of corporates via the marker true. Margin lending rate for new Loans. Industry the marker true Alsor effective of ease of access to fundstrinduruting. </td <td>Banking</td> <td>Measures each is simulation and is an important indicator of concernic activity particularly in the informal partor</td>	Banking	Measures each is simulation and is an important indicator of concernic activity particularly in the informal partor
Bank non-jood credit growth (%Yor) Measures total inon-jood bank credit growth. The key sub components are personal credit growth (Theme Lon, au Personal credit (SYOY) Lendit to Industry (%Yor) Lans, personal Loop, credit cards ect., credit to Industry (bancy). These are reflective of consumption Credit to Services (Noro) Deposit growth (%Yor) Measures total deposit growth in the banking system and credit to adeposit ratio (%) Total credit (SY) Measures total deposit growth in the banking system and credit to services (Noro) Weighted average denois rate of Banks (%) G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gs yields average deposit rate of Banks (%) Weighted average deposit rate of Banks (%) Cost of deposits for banks Median MCLR (%) Measures demand for soft are or solution of the governments ability to service its debt. Weighted average deposit rate of Banks (%) Cost of deposits for banks Mealar MCLR (%) Measures demand for soft are my long of corporates via the market route. Also reffective of ease of access to Junds industry Cement production (% Yor) Measures volume of stele production and tetermines the construction component of GOP Stele production (% Yor) Measures volume of stele production and to the soft deposits on the manufacturing. Commercial Page production (% Yor) Measures volume of for production (% Yor) <td></td> <td></td>		
Personal credit (\$NOT) Inans, personal loan, credit cardits etc.) credit to industry (nans for informature, large comportes and large project consumption Credit to industry (\$NOT) economy, industry demand for credit a services vector demand for credit respectively. Deposit growth (\$NOT) Measures total deposits reflects credit demand vs. availability of funds in the banking system and hence scope f Credit to deposit ratio (\$N) Fradeworks (\$NOT) Usard S-Sec yields (\$N) Genose total deposits reflects credit demand vs. availability of funds in the banking system and hence scope f Usard S-Sec yields (\$N) Genose total deposits reflects credit demand vs. availability of funds in the banking system and hence scope f Usard S-Sec yields (\$N) Genose total deposits reflects credit demand vs. availability of funds in the banking system and hence scope f Usard S-Sec yields (\$N) Genose total deposits in the government's ability to service its debt. Weighted average lending rate of fanks (\$N) Measures volume of comprates vs the marker trute. Also reflective of ease of access to funds industry Credit to fundstry Measures volume of comprates vs the marker trute. Also reflective of ease of access to funds industry Industry Measures volume of comprates vs the marker trute. Also reflective of ease of access to funds industry Consumer conduction (\$Y YOT) Measures volume of comprates vs the marker trute. Alsoreflective vol		
Credit to industry (%ivit) and credit to services (loans given to NBECs and service related industry). These are reflective of consumption Credit to services (Xivit) econsum, industry's devices (consumption) Credit to deposit ratio (%) Total consum, industry's devices (consumption) Veginted services (Xivit) Measures total deposit growth in the banking system and hence scope J transmission of rate cuts. Greater services (Xivit) Greater services (Sivit) Weighted average deposit rate of Banks (%) Const of deposits (or banks (%) Weighted average deposit rate of Banks (%) Cost of deposits (or banks (%) Median MCLR (%) Cost of deposits (or banks (%) Commercial Paper issuance (%Yor) Measures volume of stele production of for envice lons. Indicator of effectiveness of monetary transmission Const of (% Yor) Measures volume of stele production determines the construction component of GDP Stele production (% Yor) Measures volume of result production (IP) measures volume of industrial output. It is an index which details out t Consumer non-durable production (% Yor) The index of Industrial Production (IP) measures volume of consumer durable output including automobiles, and (3) and envice sectors. A lead indicator of manufacturing descript on summer and service sectors and avervice sector sectors. A lead indicator of consumer durable output indivify MKG productis Consumer dura		
Credit to services (NYM) economy, industry's demand for credit and services: sector demand for credit respectively. Deposit growth (KYM) Kessures total deposits growth in the banking system Credit to deposit ratio (%) Total credit / Total deposits relects credit demand vs. availability of funds in the banking system and hence scope J Vields deverage lending rate of Banks (%) Credit to deposit rate of banks (%) Weighted average lending rate of banks (%) Credit to deposit rate of banks (%) Commercial Pare suance (%YW) Measures demand for short term Junks of corporates via the market route. Also reflective of ease of access to funds in the positive of viels and termines the construction component of GDP Credit to deposits (YW) Measures valume of steel production (WP) Measures valume of steel production (WP) Steel production (% YW) Measures are part of [IP manufacturing. Measures volume of donestic capital goods production (% YW) Mining (% YW) The index of industrial Production (IP) measures volume of donestic capital goods production (% YW) Consumer on-drable production (% YW) These are part of [IP manufacturing. Measures volume of donestic capital goods production which is (1) reflective the capex cycle, (2) measures volume of onsetic capital goods production, which is (1) reflective the sapex (PKH) is an index of the prevailing direction of economic trends in the manufacturing sector performance tasks into account usiness sentiment order book, prices, employment etc. <t< td=""><td></td><td></td></t<>		
Deposit growth (%rov) Measures total deposit growth in the banking system Credit to deposit ratio (%) Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope J transmission of rate cuts. O year G-Sec yields (%) G-Secse are securities issued by Contral Government to borrow from financial market to meet its fiscal deficit. Gs yields are determinant of the government's ability to service its debt. Weighted average denois rate of banks (%) Cost of deposits for banks Median MCLR (%) Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds industry Resource demand for short term funds of corporates via the market route. Also reflective of ease of access to funds industry Resource demand for short term funds of corporates via the market route. Also reflective of ease of access to funds industry Resource demand for short term funds of corporates via the market route. Also reflective of ease of access to funds industry Resource demand for short term funds of corporates via the market route. Also reflective of ease of access to funds industry Resource hold (%YO) Measures volume of steel production determines the construction component of GDP Resource hold (%YO) The lack of Industrial Production (% YOY) Capital goods production (% YOY) The save part of IUP nanufacturing. Measures volume of consumer durable production (% YOY) <td< td=""><td>5 ()</td><td></td></td<>	5 ()	
Credit to deposit ratio (%) Total deposits relices credit demand vs. availability of funds in the banking system and hence scope J Credit to deposit ratio (%) G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gs Weighted average lending rate of Banks (%) Lending rate for all loans Gomercial Paper issuance (%) Lending rate for new loans. Indicator of effectiveness of moetary transmission Median MCLR (%) Measures volume of cement production and determines the construction component of GDP Industry Measures volume of cement production (% YoY) Measures volume of cement production (% YoY) Measures volume of cement production and determines the construction component of GDP If (XiYO) The lindex of industrial Production (IP) measures volume of moetstrial output. It is an index which details out to manufacturing (% YoY) Mining (% YoY) These are part of IIP manufacturing. Measures volume of donestic capital goods production which is (1) reflective the capex cytic, (2) measures volume of consume of moduting automobiles, and (3) measures volume of consumer durable production (% YOY) Mining Ki YoY) Measures average rural wages which determines rural propensity to consume modulating water solume of manufacturing sector performance takes into account which is (1) reflective the capex cytic, (2) measures volume of consume durable output including automobiles, and (3) measures volume of consume form alloacacunting sector performance takes into account basines		
Creat Outpoint Fable (%) Transmission of rate cuts. 10 year G-Sec yields (%) G-Secs are securities issued by Central Government's ability to service its debt. weighted average lending rate of Bank (%) G-Secs are securities issued by Central Government's ability to service its debt. Weighted average lending rate of Bank (%) Got of deposits for banks Mediam ACLI (%) Cost of deposits for banks Commercial Paper issuance (%VoY) Measures solume of cement production and determines the construction component of GDP Steel production (% VoY) Measures solume of cement production determines the construction component of GDP Exercise (%VoY) The index of industrial Production (IP) measures volume of industrial production (% VOY) Capital goods production (%VOY) These are part of IIP manyfacturing, Measures volume of consumer durable output including automobiles, and (3) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer durable production (% VOY) Consumer non-durable production (% VOY) These are part of IIP manyfacturing, Measures volume of consumer durable production (% VOY) Consumer non-durable production (% VOY) These are part of IIP manyfacturing sector performance takes into account business sentiment order book, prices, employment etc. Consumer on-durable production (% VOY) The service sectors. A lead indicator of manifacturing sector performance takes into a	Deposit growth (%YoY)	
10 year G-Sec yields (%) G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gs yields are determinant of the government's ability to service its debt. Weighted average lending rate of Banks (%) Cending rate for all loans Median MCLB (%) Margin Lending rate for all loans Median MCLB (%) Margin Lending rate for all loans Commercial Paper issuence (%VoY) Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds industry Maning (% YoY) Measures volume of steel production determines the construction component of GDP Steel production (% YoY) Measures volume of steel production (HP) measures volume of industrial notup. It is an index which details out to growth of various sectors in an economy such as mineral mining electricity (% NY) Capital goods production (% YOY) These are part of IIP manufacturing. Measures volume of consumer non-durable production (% YOY) Capital goods production (% YOY) These are part of IIP manufacturing sector performance takes into account business sentiment on-durable production (% YOY) PMI Adardizating Index The Prochasing Managers' Index (WhI) is an index of the prevailing direction of economic trends in the manufacturing networks are agree rural wages which determines rural propensity to consume Consumer non-durable production (% YOY) Measures average rural wages which determines rural propensity to consume	Credit to deposit ratio (%)	
Weighted average lending rate of Banks (%) Lending rate for all loans Weighted average deposit rate of banks (%) Loss of deposits for banks Commercial Paper issuance (%YoY) Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds Industry Cement production (% YoY) Steel production (% YoY) Measures volume of cement production and determines the construction component of GDP Steel production (% YoY) Measures volume of steel production determines the construction component of GDP Mining (% YoY) The Index of Industrial Production (IP) measures volume of domestic capital goods production (% YoY) Capital goods production (% YoY) These are part of IP manufacturing. Measures volume of domestic capital goods production (% YoY) PM Manufacturing (% YoY) These are part of IP manufacturing Measures volume of domestic capital goods production (% YoY) PM Manufacturing index The Purchasing Maagers' linde, (M) is an index of the prevailing direction of economic trends in the manufacturing Measures average rural wages which determines rural propensity to consume PM anafacturing index The Purchasing Maagers' linde, (M) is an index of prevailing direction of economic trends in the manufacturing measures avolume of wolesale motor vehicle sales (% YoY) PM anafacturing index Measures average rural wages which determines rural propensity to consume Roral wage (% YoY) <td>10 year G-Sec yields (%)</td> <td>G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Median MCLR (%) Margin lending rate for new loans. Indicator of effectiveness of monetary transmission Commercial Paper issuance (%YoY) Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds Industry Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds Steel production (% YoY) Measures volume of cement production and determines the construction component of GDP IIP (% YoY) The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out to Mangin Editoria (% YoY) These are part of IIP manufacturing. Measures volume of domustrial output. It is an index which details out to Consumer our-durable production (% YoY) These are part of IIP manufacturing. Measures volume of domustic capital goods production which is (1) reflective Consumer our-durable production (% YoY) The ecapex cycle. (2) measures volume of ormustic capital goods production which is (1) reflective PMI Manufacturing Index The Purchasing Managers' index (PMI) is an index of the prevailing direction of economic trends in the manufacturing PMI Services Index onder books prices, employment etc. Consumer Onsumer our durable output inductor of manufacturing sector performance takes into account business sentiment PMI Composite Index Measures volume of motor spirit consumption </td <td>Weighted average lending rate of Banks (%)</td> <td>Lending rate for all loans</td>	Weighted average lending rate of Banks (%)	Lending rate for all loans
Commercial Paper issuance (%YoY) Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds industry Cement production (% YoY) Measures volume of cement production and determines the construction component of GDP Steel production (% YoY) Measures volume of steel production determines the construction component of GDP Mining (% YoY) The index of industrial Production (IIP) measures volume of industrial output. It is an index which details out t	Weighted average deposit rate of banks (%)	Cost of deposits for banks
Industry Measures volume of cement production (% YOY) Steel production (% YOY) Measures volume of steel production determines the construction component of GDP IIP (%YOY) The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out t Maining (% YOY) The Index of Industrial Production (IIP) measures volume of domestic capital goods production (% YOY) Capital goods production (% YOY) These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective Consumer non-durable production (% YOY) The capax cycle, (2) measures volume of comestic usatiling direction of economic trends in the manufacturing PMI Manufacturing Index The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing PMI Composite Index The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing PMI Composite Index One book, prices, employment etc. Consumer Measures average rural wages which determines rural propensity to consume Motorvhicle sales (%YOY) Measures volume of motor spirit consumption Passenger Vehicle (% YOY) Measures volume of motor spirit consumption Two wheeler (% YOY) Measures volume of prois proxy for Exits industrial activity in the economy Direct onsumption (%YOY)	Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Cement production (% YoY) Measures volume of seement production and determines the construction component of GDP Steel production (% YoY) Measures volume of steel production determines the construction component of GDP Mining (% YoY) The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out t Manufacturing (% YoY) The Index of Industrial Production (IIP) measures volume of domestic capital goods production which is (1) reflective Consumer non-durable production (% YoY) These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective Consumer non-durable production (% YoY) These are part of IIP manufacturing. Measures volume of consumer foru-durable output including automobiles, and (3) measures volume PMI Manufacturing Index The Purchasing Managers' Index (PMIC) products. PMI Services Index and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment or der book, prices, employment etc. Consumer Rural wage (% YoY) Measures volume of foreign touris spirit consumption Measures volume of moundacturing in the consumer Passenger Vehicle (% YoY) Measures volume of foreign tourist arrivals into the contry. Tractor sales Measures volume of foreign tourist arrivals into the contry. Freight Measures volume of foreign tourist arrivals into the count	Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Steel production (% YoY) Measures volume of steel production (HP) measures the construction component of GDP. IP (%YOY) The ladex of industrial Production (HP) measures volume of industrial output. It is an index which details out to Mandjacturing (%YOY) Capital goods production (%YOY) These are part of IP manufacturing. Measures volume of domestic capital goods production (%YOY) Capital goods production (%YOY) These are part of IP manufacturing. Measures volume of domestic capital goods production which is (1) reflective to consumer durable production (%YOY) Consumer on-durable production (%YOY) These are part of IP manufacturing. Measures volume of other prevailing direction of economic trends in the manufacturing sectors. A lead indicator of manufacturing sector performance takes into account business sentiment order book, prices, employment etc. Consumer Oral services sectors. A lead indicator of manufacturing sector performance takes into account business sentiment order book, prices, employment etc. Consumer Measures subtract of wholesale motor vehicle sales (passenger vehicles, tractor, commercial and two wheele i.e. dispatches from manufacturers to dealers. Indicator of consumption activity. Passenger Vehicle (% YoY) Measures volume of motor spirit consumption Derest consumption (% YOY) Measures volume of foreign tourist arrivals into the country. Air traffic (% YoY) Measures volume of foreign tourist arrivals into the country. Air traffic (% YoY) Measures value of exports flow	Industry	
IIP (\$YoY) The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out t Mining (\$YoY) The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out t Maning (\$YoY) These are part of IIP manufacturing. Measures volume of domestic capital goods production (\$YoY) Consumer non-drable production (\$YoY) These are part of IIP manufacturing. Measures volume of consumer non-drable output including automobiles, and (3) measures volume Consumer non-drable production (\$YoY) These are part of IIP manufacturing. Measures volume of consumer non-drable output including automobiles, and (3) measures volume PMI Manufacturing index The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing PMI Services Index and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment order book, prices, employment etc. Commercial Vehicle (% YoY) Measures average rural wages which determines rural propensity to consume Passenger Vehicle (% YoY) Measures volume of motor spirit consumption Detect consumption (% YoY) Measures volume of motor spirit consumption Detect consumption (%YoY) Measures volume of motor spirit consumption Detect consumption (%YoY) Measures volume of motor spirit consumption which reflects industrial activity in the economy <t< td=""><td></td><td>Measures volume of cement production and determines the construction component of GDP</td></t<>		Measures volume of cement production and determines the construction component of GDP
IIP (\$YoY) The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out t Mining (\$YoY) The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out t Maning (\$YoY) These are part of IIP manufacturing. Measures volume of domestic capital goods production (\$YoY) Consumer non-drable production (\$YoY) These are part of IIP manufacturing. Measures volume of consumer non-drable output including automobiles, and (3) measures volume Consumer non-drable production (\$YoY) These are part of IIP manufacturing. Measures volume of consumer non-drable output including automobiles, and (3) measures volume PMI Manufacturing index The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing PMI Services Index and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment order book, prices, employment etc. Commercial Vehicle (% YoY) Measures average rural wages which determines rural propensity to consume Passenger Vehicle (% YoY) Measures volume of motor spirit consumption Detect consumption (% YoY) Measures volume of motor spirit consumption Detect consumption (%YoY) Measures volume of motor spirit consumption Detect consumption (%YoY) Measures volume of motor spirit consumption which reflects industrial activity in the economy <t< td=""><td>Steel production (% YoY)</td><td>Measures volume of steel production determines the construction component of GDP</td></t<>	Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
Manufacturing (%YOY) growth of various sectors in an economy such as mineral mining, electricity and manufacturing. Electricity (%YOY) These are part of IIP manufacturing, Measures volume of domestic capital goods production which is (1) reflective (Consumer non-durable production (% YOY) Consumer non-durable production (% YOY) These are part of IIP manufacturing, Measures volume of consumer inon-durable output particularly FMCG products. PMI Manufacturing Index The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing manufacturing sectors. A lead indicator of manufacturing sector performance takes into account business sentiment or der book, prices, employment etc. Consumer nor-value production (% YOY) Measures average rural wages which determines rural propensity to consume Motorvehicle sales (%YOY) Measures total number of wholesale motor vehicle sales (passenger vehicles, tractor, commercial and two wheeled (% YOY) Tractor sales Measures volume of motor spirit consumption Petrol consumption (% YOY) Measures volume of motor spirit consumption Diesel consumption (%YOY) Measures volume of foreign turist arrivals into the country, an important determinant of trade, hotels, transport storage and communicati component of GDP. Freight Measures value of exports Major port tarffic (%YOY) Measures value of inports Measures value of inports Measures value of inports		
Electricity (%Yor) These are part of IIP manufacturing. Measures volume of domestic capital goods production (%YoY) Consumer durable production (%YoY) These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable production (% YoY) PMI Manufacturing Index The Purchasing Managers' Index (PMI) is an index of the prevaling direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment or boomser of consumer on mulacturing sector of a base (% YoY) Measures varage rural wages which determines rural propensity to consume Motorvehicle sales (% YoY) Measures total number of wholesale motor vehicle sales (passenger vehicles, tractor, commercial and two wheeled is dispatches from manufacturers to dealers. Indicator of consumption activity. Tractor sales Petrol consumption (% YoY) Desel consumption (% YoY) Measures volume of high speed diesel consumption which reflects industrial activity in the economy. Air traffic (% YoY) Domestic passengers flown, an important determinant of trade, hotels, transport storage and communicati component of GDP. Freight Major port tarffic (% YoY) Measures value of foreign tourist arrivals into the country. Freight Major port tarffic (%	Mining (% YoY)	The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out the
Electricity (%Yor) These are part of IIP manufacturing. Measures volume of domestic capital goods production (%YoY) Consumer durable production (%YoY) These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable production (% YoY) PMI Manufacturing Index The Purchasing Managers' Index (PMI) is an index of the prevaling direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment or boomser of consumer on mulacturing sector of a base (% YoY) Measures varage rural wages which determines rural propensity to consume Motorvehicle sales (% YoY) Measures total number of wholesale motor vehicle sales (passenger vehicles, tractor, commercial and two wheeled is dispatches from manufacturers to dealers. Indicator of consumption activity. Tractor sales Petrol consumption (% YoY) Desel consumption (% YoY) Measures volume of high speed diesel consumption which reflects industrial activity in the economy. Air traffic (% YoY) Domestic passengers flown, an important determinant of trade, hotels, transport storage and communicati component of GDP. Freight Major port tarffic (% YoY) Measures value of foreign tourist arrivals into the country. Freight Major port tarffic (%	Manufacturing (%YoY)	growth of various sectors in an economy such as mineral mining, electricity and manufacturing.
Consumer durable production (% YoY) the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume consumer non-durable output particularly FMCG products. PMI Manufacturing Index The Purchasing Managers' index (PMI) is an index of the prevailing direction of economic trends in the manufacturing NMI Services Index PMI Composite Index and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment order book, prices, employment etc. Consumer measures volume of wholesale motor vehicle sales (% toY) Passenger Vehicle (% toY) Measures total number of wholesale motor vehicle sales (passenger vehicles, tractor, commercial and two wheeler i.e. dispatches from manufacturers to dealers. Indicator of consumption activity. Tractor sales Petrol consumption (% YoY) Diesel consumption (% YoY) Measures volume of motor spirit consumption Diesel consumption (% YoY) Measures volume of foreign tourist arrivals into the country. an important determinant of trade, hotels, transport storage and communication component of GDP. Freight main freight traffic (% YoY) Mail freight YoY) Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country. Freight mains freight traffic (% YoY) Mais prost tartific (% YoY) Measures value of exports Mail freight YoY) Measures value of exports	Electricity (%YoY)	
Consumer durable production (% YoY) the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume consumer non-durable output particularly FMCG products. PMI Manufacturing Index The Purchasing Managers' index (PMI) is an index of the prevailing direction of economic trends in the manufacturing NMI Services Index PMI Composite Index and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment order book, prices, employment etc. Consumer measures volume of wholesale motor vehicle sales (% toY) Passenger Vehicle (% toY) Measures total number of wholesale motor vehicle sales (passenger vehicles, tractor, commercial and two wheeler i.e. dispatches from manufacturers to dealers.
