Market Outlook - Equity

Indian equity markets remained volatile in the month of November 2024. The Nifty 50 Index managed to close above the 24,100 level after falling below 23,400 level during the month. It made a minor loss of 0.3% in this month, outperforming the emerging markets index. Sector-wise IT (+6%) was one of the best-performing sector, followed by consumer durables (+3%) and capital goods (+2.3%). Power, metals and oil & gas indices declined 4.3%, 2.4% and 2.3% respectively. Foreign Portfolio Investors (FPIs) sold USD 4.7 bn of Indian equities in the secondary market, whereas Domestic Institutional Investors (DIIs) bought USD5.3 bn. In Nov 2024, the INR weakened significantly against the USD. FPI flows were negative for most of the emerging markets.

In US both Nasdaq and S&P 500 rallied by 3% each led by positive sentiments around Donald Trump winning the US presidential elections. US Core PCE (Personal Consumption Expenditure) Index based inflation rose 2.8% YoY in October – the highest since April. This was driven by services and core services ex-housing components, indicating inflationary pressures moderating but remaining alive. The unemployment rate has settled at 4 -4.1% for the past six months. US Federal Reserve cut interest rates by 25 bps. President Donald Trump intends to impose a 25% tariff on all goods coming from Mexico and Canada and an additional 10% tariff on China, until they clamped down on drugs, particularly fentanyl, and migrants crossing the border.

India's CPI (Consumer Price Index) inflation came in at 6.2% in October 2024, crossing the upper limit of 6% of the RBI's inflation band. WPI (Wholesale Price Index) accelerated to 2.4% in October as against 1.8% in September. Industrial activity slowed down to 3.9% YoY vs 8.4% YoY in Q1. This dragged down overall GDP (Gross Domestic Product) growth in Q2FY25. GDP growth slowed to a near two years low of 5.4% YoY in Q2FY25. Sluggish manufacturing & mining growth and weak urban consumption were key components impacting GDP growth. Decline in Government capex and lower credit growth impacted GDP numbers too. Economic indicators like electricity consumption, Index of Industrial Production or IIP, Purchasing Managers' Index or PMI and loan growth show that India is witnessing a cyclical slowdown, with urban consumption slowing down and the recovery in rural markets being gradual.

Domestic economic activity picked up momentum around the festival weeks at the end of Oct/early Nov 2024, as seen from indicators like automobile retail sales, and online sales GMV (gross merchandise value) scaling a new peak during the festivals. The improvement in the consumer sentiment around Oct 2024 festivals as highlighted by RBI data, especially in rural areas helped drive good festive retail demand across segments, albeit with a trend of rising discounts.

The 2QFY25 Nifty-50 EPS posted a 4% rise YoY, lower than consensus estimates. High single-digit EBITDA growth was seen in telecom, financials, IT and FMCG sectors. In the last two months of the results season, Nifty-50 Bloomberg consensus EPS (Earnings Per Share) witnessed a 3-4% cut for FY25F-26F while the reduction in Nifty-200 was limited to 2%. Major downgrades are in commodity, FMCG and capital goods sectors while upgrades are restricted to utilities and pharmaceutical sectors.

Focus now likely to shift to upcoming RBI policy and whether Governor will cut rates given weak GDP print. There are challenges, however: inflation is still running hot at over 6% and the DXY (US Dollar Index) strength puts the RBI in a tricky spot for the next 1-2 quarters. Weak 2QFY25 corporate results season, ongoing geopolitical tensions and potential policy shifts under the incoming US administration are likely to weigh on investor sentiments. Bright spots seem to be on higher water reservoir levels which can help drive rural growth. A potential increase in Government Capex in 2H may aid economic recovery in coming quarters.

Market Outlook - Fixed Income

Global Economy -

As we mark the end of November and begin the countdown to the upcoming year, during an average or a normal year this month would have been about Thanksgiving in the west coupled with Black Friday sales and of course International Men's Day. But this time November-2024 has been more about riding the tides of election anxieties both in anticipation and then on actual realization of US elections results. Its not about international men's day, its about the Man itself this time. The newly elected US President Donald Trump, a man, or 'The Man', has been driving the markets crazy or must say keeping the markets excited with his intentions of 'America First' and resultant changes in US trade and fiscal policies. These may be potent enough to disrupt the global flows and trades which in hindsight have not been that stable for quite some time. Fears of fiercer trade wars hung over the outlook on tariff proposals and potential retaliation - the International Monetary Fund (IMF) cautioned in its World Economic Outlook that higher tariffs could wipe out 0.8% of output in 2025 and 1.3% in 2026.

Looking deeper into November, post US elections and economic releases in US, Japan, China etc. the world markets, be it currency, commodity, equities and bonds, all have had their share of volatilities. Therefore, the level of uncertainty surrounding the outlook remained elevated.

US yields have been swinging both ways post releases of US economic data points. Reflecting the issues of soaring debt levels, alongside a stronger economy but normalising labor market conditions and fear of inflation resurgence. Similarly DXY got stronger initially before correcting from the highs pricing in stronger US economy and likely impact on Euro and CNY (once actual Tariff War play out)

On the flip side, China continues to face economic challenges. The challenges warranted economic measures, which therefore weighed on the currencies. China's expansionary fiscal policies along with dollar strength has been weighing on other emerging market currencies.

Source: Bloomberg, Data as on 01.12.2024

On commodities front, gold prices touched its all-time high in November, whereas Brent prices remained range bound irrespective of global geopolitical tensions. Majorly the fundamentals of demand supply dynamics keeping a cap at the volatility.

Domestic Economy -

Certain momentum loss and earnings downgrades along with lower-than-expected Q2 FY25 GDP added to the worries of slowing economic activity. Previously the concerns were visible in the rural economy and eventually an industrial output drag in Q2, resulted in a sharper drag on growth. India's GDP growth

came at 5.4% y/y in Q2 FY25 vs market expectations ranging between 6.3% -6.5%. The growth rate slowed from 6.7% in Q1 FY25 and long-term trend of 6.6%. The divide in expectations was led by slowed manufacturing and mining activity.

Source: Bloomberg, Data as on 01.12.2024

After a slow Q2 FY25, the trend in high frequency indicators for the month of Oct/Nov have again reflected a pickup in economic activity. The pickup was led by festive boost, strong rural recovery, and improving industrial output.

India's Composite Output PMI Index posted 58.6 in Nov-24, down only marginally from 59.1 in October-24 and therefore indicating a sharp rate of expansion. The Purchasing managers index (PMI) surveys highlighted cost pressures to have weighed on domestic sales, but international order growth remained strong.

Industrial activity too reflected an upturn, with eight core industries sequentially growing by 4.2% after declining for four consecutive months.

Along with the pickup in economic activity, the uptick in government spending, improving rural demand & easing financial conditions are likely to be key drivers to sustain the growth recovery in the second half of FY25.

Source: Bloomberg, Data as on 01.12.2024

On the fiscal front, fiscal deficit touched 46.5% of budget estimates with internals showing a robust revenue collection despite the big state transfer to states in Oct-24. Revenues remained supported on back of strong income taxes (53% of budget estimates and 20% y/y) and indirect taxes (56% of budget estimates and 10% y/y). On the expenditure side, revenue is getting more focus (54% of budget estimates and 9% y/y). In contrast, capex is distinctly lagging (42% of BE and -15% y-o-y). Overall, while fiscal deficit in control is a good sign, it is not if it is at the cost of capex.

Domestic Inflation -

Source: Bloomberg, Data as on 01.12.2024

- Headline inflation picked up sharply from 5.5% in Sep-2024 to 6.21% in Oct-2024. The pickup has been attributed to shocks to food inflation which became sharper in Oct-24.
- The expectations of headline inflation in Q3 FY25 is tracking above 5.5%, diminishing any expectations of rate cut in

December-2024.

- Having said that, we expect the volatility in perishable food prices to continue and the decline to be sharper in Q4 FY25 with the arrival of winter crops.
- But the question is whether the decline might be able to offset the current shocks to headline inflation.
- Over the coming months, we could see core trending back to 4% plus into FY25 as super core (ex. precious metals) is also rising. Which means it is critical for food inflation to come down, to get to a durable 4% target.

Domestic Liquidity -

Source: Bloomberg, Data as on 01.12.2024

- India's interbank liquidity turned into a deficit by end of November-24.
- The expectations that liquidity could worsen heading into end-FY25 (ends March 2025) have risen led by expectations of increase in Currency In Circulation (CIC) and an increase in banks' CRR requirement. Additionally volatile FPI flows have added to concerns on BOP.
- The above acts as a counter to the RBI's 'neutral' monetary policy stance. As a result, market expectations of liquidity injection measures may have picked up ahead of 6 December Monetary Policy Committee (MPC) announcement.

Fixed Income Outlook -

Source: Bloomberg, Data as on 01.12.2024

- Global headwinds have been weighing on INR and will be a key watch.
- On the domestic front inflation remains a key watch for RBI's monetary policy decision making. With October print higher than 6%, and expectations of November inflation to be closer to 6% number.
- Recent weakness in growth indicators have once again raised the need and expectations of rate cuts. The key here is the dynamics between inflation and growth.
- We expect RBI to continue with the pause in December policy and the policy language to focus more on liquidity conditions through potential reduction in CRR.
- Our base case scenario of rate cut expectations remains the same. We expect RBI MPC policy to follow the inflation trajectory and any space for a domestic pivot is expected in Q4 FY25.
- Our view on rates remain constructive on account of favorable demand supply dynamics as well as positive real rate conditions.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that “companies create wealth and not markets” and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management - Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with **superior** and **sustainable** earnings growth with **strong management**, at **reasonable valuations**.

MANAGEMENT

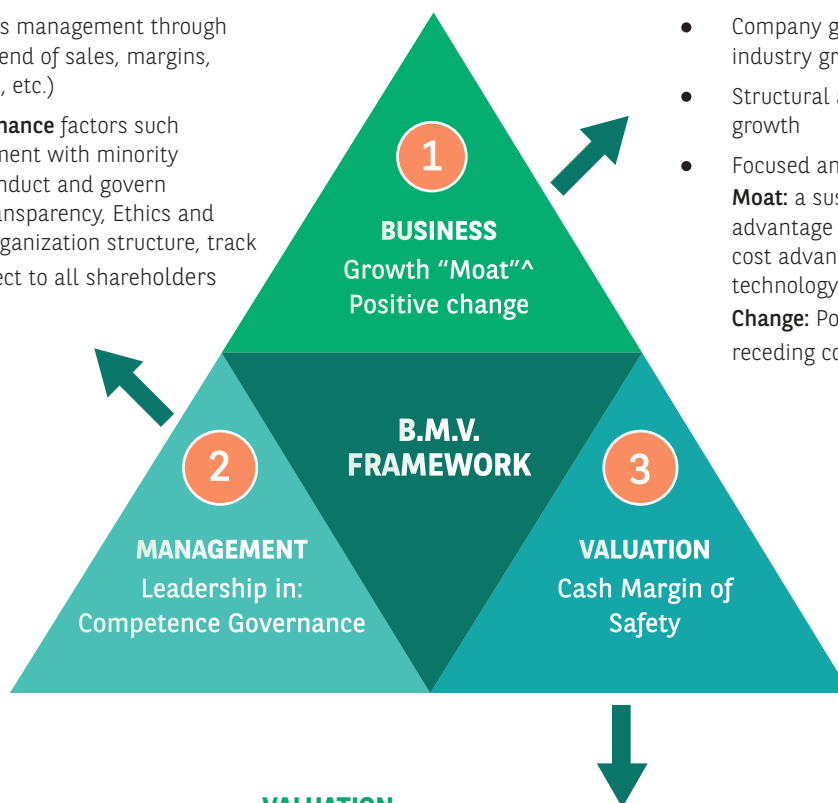

Leadership in:

- **Competency** basis management through market cycles (trend of sales, margins, capital allocation, etc.)
- **Corporate Governance** factors such as interest alignment with minority shareholders, Conduct and govern business with Transparency, Ethics and Accountability, organization structure, track record with respect to all shareholders

BUSINESS

Growth:

- Company growing faster than industry, industry growing faster than market
- Structural and long-term sustainable growth
- Focused and simple to understand
Moat: a sustainable competitive advantage arising from brand franchise, cost advantage, industry structure, technology/patents, distribution, etc.
Change: Positive change in sector, receding competitive intensity

VALUATION

- **Cash flow** is central to the way we think about a company's value
- **Valuations:** Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield, Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the **margin of safety** required
- Superior **risk-reward** profile

^A sustainable competitive advantage

CREDIT QUALITY PROFILE

SCHEME WISE POTENTIAL RISK CLASS (PRC) MATRIX*

Credit Risk (Max) →	Relatively Low: Class A (CRV=>=12)	Moderate: Class B (CRV=>=10)	Relatively High: Class C (CRV<=10)
Interest Rate Risk (Max) ↓			
Relatively Low: Class I (MD<=1 year)		B-I	
Moderate: Class II (MD<=3 year)			
Relatively High: Class III (Any MD)			

MD=Macaulay Duration, CRV=Credit Risk Value.

* The PRC matrix denotes the maximum risk that the respective Scheme can take i.e. maximum interest rate risk (measured by MD of the Scheme) and maximum credit risk (measured by CRV of the Scheme)

** CARE's fund quality rating is not a recommendation to purchase, sell, or hold a security/fund. It neither comments on the current market price, suitability for a particular investor nor on the prospective performance of the fund with respect to appreciation, volatility of net asset value (NAV), or yield of the fund. The ratings do not address the funds ability to meet the payment obligations to the investors.

^^ The rating, as aforesaid, however, should not be treated as a recommendation to buy, sell or hold the units issued by you. The rating is restricted to your debt fund only. ICRA does not assume any responsibility on its part, for any liability, that may arise consequent to your not complying with any guidelines or directives issued by SEBI or any other mutual fund regulatory body.

^Pursuant to para 4.5.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

Baroda BNP Paribas Overnight Fund

(An open-ended debt scheme investing in overnight securities. A Relatively Low Interest Rate Risk and Relatively Low Credit Risk Scheme)

This product is suitable for investors who are seeking*:

- ▶ Generate returns, commensurate with low risk and high level of liquidity.
- ▶ Invest in overnight securities having maturity of one business day.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

For Distribution History kindly refer page no. 57.

Note on Segregated Portfolio: Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular- Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had filed a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

***Kindly note that with effect from September 11, 2024, Baroda BNP Paribas Medium Duration Fund ("Merging Scheme") has merged into Baroda BNP Paribas Credit Risk Fund ("Surviving Scheme"). The segregated portfolio under the merging scheme is now under the surviving scheme.

Past performance may or may not be sustained in future and is not a guarantee of future returns and should not be used as a basis of comparison with other investments. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown.

* Compounded Annual Growth Rate (CAGR) Returns are computed after accounting for the cash flow by using the XIRR method

For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to page no. 51. Please note TRI indicates Total Return Index.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website <https://www.amfiindia.com/research-information/other-data> and <https://www.amfiindia.com/importantupdates>.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem the fund at ₹ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage Change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme. These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link <https://www.barodabnpbaribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes> on website of mutual fund.

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	
Currency in circulation (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector
M3 (% YoY)	Measures money supply and is linked to real GDP growth and inflation
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects) and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in economy, industry's demand for credit and services' sector demand for credit respectively.
Personal credit (%YoY)	
Credit to industry (%YoY)	
Credit to services (%YoY)	
Deposit growth (%YoY)	Measures total deposit growth in the banking system
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope for transmission of rate cuts.
10 year G-Sec yields (%)	G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec yields are determinant of the government's ability to service its debt.
Weighted average lending rate of Banks (%)	Lending rate for all loans
Weighted average deposit rate of banks (%)	Cost of deposits for banks
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Industry	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
IIP (%YoY)	
Mining (% YoY)	
Manufacturing (%YoY)	
Electricity (%YoY)	
Capital goods production (%YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable output particularly FMCG products.
Consumer durable production (% YoY)	
Consumer non-durable production (% YoY)	
PMI Manufacturing Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on order book, prices, employment etc.
PMI Services Index	
PMI Composite Index	
Consumer	
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume
Motorvehicle sales (%YoY)	
Passenger Vehicle (% YoY)	
Commercial Vehicle (% YoY)	
Two wheeler (% YoY)	
Tractor sales	
Petrol consumption (% YoY)	Measures volume of motor spirit consumption
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication component of GDP.
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport storage and communication component of GDP.
Freight	
Major port tariffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country
Foreign Trade	
Export growth (% YoY)	Measures value of exports
Import growth (% YoY)	Measures value of imports
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.
Fiscal	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence and other services component of GDP.
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.
Inflation	
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is consumer price inflation excluding food and fuel.
Core CPI (%YoY)	
WPI (%YoY)
