Investment objective	The Scheme seeks to generate income and capital appreciation by investing in a diversified portfolio of equity and equity related instruments and fixed income instruments. However, there can be no assurance that the investment objectives of the Scheme will be realized. The Scheme does not guarantee/indicate any returns.		
Asset Allocation Pattern of the Scheme	The asset allocation of the scheme under normal circumstances would be:		
	Type of Instruments	Minimum Allocation (% of Net Assets)	Maximum Allocation (% of Net Assets)
	Debt Instruments & Money Market Instruments (including cash / call money)	20	35
	Equity & Equity related securities	65	80
	Units issued by REITs & InvITs	0	10
	#including investments in foreign equity and equity related securities, ADR / GDR upto 25% of the net assets. *Debt instruments may include securitised debt upto 20% of the net assets.		
	Exposure in debt derivatives only for hedging and portfolio balancing shall not exceed 20% of the debt assets. Investment in derivatives including imperfect hedging using Interest Rate Futures shall be in line with the guidelines prescribed by SEBI from time to time. The Scheme may invest on Credit Default Swaps (CDS) and the exposure in CDS transactions shall not exceed 6% of the net assets of the Scheme, exposure to a single counterparty in CDS transactions shall not exceed 6% of the net assets of the Scheme, and the total exposure related to premium paid for all derivative positions, including CDS, shall not exceed 20% of the net assets of the Scheme. Further provided that the exposure in debt derivatives and CDS shall not exceed 20% of debt assets.		
	The Scheme may invest upto 50% of equity assets in equity derivatives instruments as permitted under the SEBI (Mutual Funds) Regulations, 1996 from time to time. The Scheme may use equity derivatives for such purposes as maybe permitted under the SEBI (Mutual Funds) Regulations, 1996, including but not limited for the purpose of hedging and portfolio balancing, based on the opportunities available and subject to guidelines issued by SEBI from time to time.		
	The Scheme may invest in foreign debt securities including foreign securitised debt upto 10% of the net assets.		
	The Scheme may enter into repos/reverse repos as may be permitted by RBI. From time to time, the Scheme may hold cash. A part of the net assets may be invested in the Tri-party repo on Government Securities or treasury bills or repo or in an alternative investment as may be provided by RBI, subject to prior approval from SEBI, if any.		
	In accordance with provisions of SEBI Circular No. CIR/IMD/DF/19/2011 dated November 11, 2011 and SEBI Circular No. CIR/IMD/DF/23/2012 dated November 15, 2012 and as amended from time to time, the Scheme may enter into repo in corporate debt securities and the gross exposure to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the scheme.		
	The Scheme may invest upto 10% of the debt portfolio of the scheme in debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption.		

In terms of SEBI circular No. SEBI/HO/IMD/DF2/CIR/P/2019/104 dated October 1, 2019, the Scheme may invest into debt instruments having Structured Obligations / Credit Enhancements upto 10% of the debt portfolio of the scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio.

The Scheme may undertake Securities Lending transactions, in accordance with the framework relating to securities lending and borrowing specified by SEBI, within following limits:

- i. Not more than 20% of the net assets can be deployed in Stock Lending
- ii. Not more than 5% of the net assets can be deployed in Stock Lending to any single intermediary.

The Scheme shall not engage in short selling.

The cumulative gross exposure through equity, debt, derivative positions, repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities /assets and such other securities/assets as may be permitted by SEBI from time to time (subject to prior approval from SEBI, if any) will not exceed 100% of the net assets of the Scheme.

It may be noted that AMC has to adhere to the asset allocation pattern indicated in the Scheme Information Document under normal circumstances.

According to SEBI circulars (reference no. SEBI/IMD/CIR No. 1/ 91171/07 dated April 16, 2007, SEBI/IMD/CIR No. 8/107311/07 dated October 26, 2007, SEBI/IMD/CIR No. 7/129592/08 dated June 23, 2008, SEBI/HO/IMD/DF4/CIR/P/2019/093 dated August 16, 2019 and SEBI/HO/IMD/DF2/CIR/P/ 2019/101 dated Sept 20, 2019), pending deployment of funds of the Scheme in securities in terms of investment objective of the Scheme, the Mutual Fund may invest the funds of the Scheme in short term deposits of scheduled commercial banks subject to restrictions laid down under the SEBI Regulations from time to time.

Portfolio rebalancing

Portfolio rebalancing in case of deviation from asset allocation under Defensive consideration:

The scheme shall rebalance the portfolio in case of any deviation to the asset allocation as per SEBI circular No. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021. Such rebalancing shall be done within 30 days from the date of occurrence of deviation. In the event of the scheme not being rebalanced within the aforesaid period, justification for the same shall be placed before Investment Committee of the AMC and reasons for the same shall be recorded in writing. Investment Committee shall then decide on the course of action and may suggest rebalancing of the portfolio. However, at all times the AMC shall ensure that the portfolio would adhere to the overall investment objective of the scheme.

Portfolio Rebalancing in case of passive deviation from asset allocation:

In accordance with SEBI circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022, as amended from time to time, the scheme shall rebalance the portfolio in case of any deviation to the asset allocation as per SEBI circular No. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021. Such rebalancing shall be done within 30 days from the date of occurrence of deviation. In the event of the scheme not being rebalanced within the aforesaid period, justification for the same shall be placed before Investment Committee of the AMC and reasons for the same shall be recorded in writing. Investment Committee shall then decide on the course of action and may suggest rebalancing of the portfolio. However, at all times the AMC shall ensure that the portfolio would adhere to the overall investment objective of the scheme.

Further, in accordance with SEBI circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022, as amended from time to time, the scheme shall rebalance the portfolio in case of any deviation to the asset allocation mentioned in the Scheme Information Document (SID) due to passive breaches. In the event of deviation from mandated asset allocation mentioned in the Scheme Information Document (SID) due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), the portfolio shall be rebalanced within a period of thirty (30) business days.

In case the portfolio of scheme is not rebalanced within the above mandated timelines, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period.

In case the portfolio of scheme is not rebalanced within the aforementioned mandated plus extended

	<p>timelines, AMCs shall:</p> <p>i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.</p> <p>ii. not to levy exit load, if any, on the investors exiting such scheme(s).</p>
Investment Strategy	<p>The funds strategy seeks to generate income and capital appreciation by taking advantage of diversification by investing in a mix of asset classes comprising equity & equity related instruments and fixed income securities including money market instruments. It also aims to manage risk through active selection within the specified asset allocation range. The aim is to improve risk adjusted returns through diversification across these asset classes.</p> <p>The equity portion of the portfolio will aim to provide long-term capital growth through a diversified and actively managed portfolio of equity and equity related securities. In case of using equity strategy the Scheme will follow a bottom-up approach for stock-picking and choose companies across sectors and the Scheme will primarily focus on companies that have demonstrated characteristics such as market leadership, strong financials and quality management, and have the potential to create wealth for their shareholders by delivering steady performance through the ups and downs of the market. The focus would be to build a diversified portfolio of both value and growth companies, all companies selected will be analysed taking into account the business fundamentals, the company's financial strength, industry structure, management quality, future earnings expectations and sensitivity of earnings.</p> <p>The debt portion of the portfolio will be actively managed based on the AMC's view on interest rates. The price of fixed income instruments varies with changes in interest rates. As interest rates decline, the value of fixed income securities rise and as interest rates rise, their value declines. The AMC forms views on the likely direction of interest rates and the portfolio is structured consistent with these views. Individual instruments are bought and sold based on the conformity with the interest rate view and the instrument specific factors (credit risk, exposure). By actively managing the portfolio, the Scheme attempts to achieve its objective through both interest yield and capital appreciation. As such, the Scheme may not invest solely based on the best available yields in the market at all points of time.</p>
Risk Profile of the scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Standard Risk Factors</p> <ul style="list-style-type: none"> - Investments in mutual fund units involves investment risks such as market risk, credit & default risk, liquidity risk, trading volumes, settlement risk, including the possible loss of principal. - As the price/ value/ interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down. The various factors which impact the value of the scheme's investments include, but are not limited to, fluctuations in the stock markets, bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the companies and issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc. - Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee future performance of the scheme. - Baroda BNP Paribas Aggressive Hybrid Fund is the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns. - The sponsors / associates are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 10,00,000/- (Rupees One ten lakh only) to the corpus of the Mutual Fund made by it towards setting up the Fund. - The present scheme is not a guaranteed or assured return scheme. <p>Scheme Specific Risk Factors are summarized as follows:</p> <p>Risks associated with investing in equities: The risks associated with investments in equities and similar instruments include significant fluctuations in prices. The impact of fluctuations is likely to be accentuated for short-term investments. The risk that the performance of one or more companies declines or stagnates may have a negative impact on the performance of the Scheme as a whole at any given time. Stock markets are volatile and can decline significantly in response to political, regulatory, economic, market and stock-specific developments etc. Different parts of the market can react differently to these developments. The stock-specific volatility may also change over a period of time as the characteristic of the stock undergoes a change in terms of market-cap category. The Scheme may hold such securities for only a very short time, which could tend to increase the costs.</p>

The Scheme may invest in growth stocks which may be more volatile than the market in general and may react differently to economic, political and market developments and to specific information about the issuer. Growth stocks traditionally show higher volatility than other stocks, especially over short periods. These stocks may also be more expensive in relation to their profits than the market in general. Consequently, growth stocks may react with more volatility to variations in profit growth.

The Fund Manager may temporarily adopt a more defensive approach if it considers that the equity market or economy is experiencing excessive volatility, a persistent general decline, or other unfavourable conditions. In such circumstances, the Scheme may be unable to achieve or pursue its investment objective.

The Scheme may invest in companies making an initial public offering. In such cases there is a risk that the price of the newly floated share is more volatile due to factors such as the absence of previous trading, unseasonal transactions and the limited number of securities available for trading.

Concentration Risk:

The scheme may pursue only a limited degree of diversification. It may invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) or be concentrated on a few market sectors. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

Risks related to arbitrage strategy:

In case of a large redemption, the Scheme may need to reverse the spot-futures transaction before the date of futures' settlement. This eventuality may lead to the basis risk. While reversing the spot-futures transaction on the Futures & Options settlement day on the Exchange, there could be a risk of volume-weighted-average-price of the market being different from the price at which the actual reversal is processed. This may result in basis risk. On the date of expiry, when the arbitrage is to be unwound, it is not necessary for the stock price and its future contract to coincide. There could be a discrepancy in their prices even a minute before the market closes. Thus, there is a possibility that the arbitrage strategy gets unwound at different prices.

Risk factors associated with investments in REITs and InvITs:

- **Price Risk / Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates and the resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events etc. REITs & InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the portfolio assets.
- **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. Further, there is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists
- **Risk of lower than expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/InvIT receives as dividends or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate based on, among other things:
 - success and economic viability of tenants and off-takers
 - economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - force majeure events related such as earthquakes, floods etc. rendering the portfolio assets inoperable
 - debt service requirements and other liabilities of the portfolio assets
 - fluctuations in the working capital needs of the portfolio assets
 - ability of portfolio assets to borrow funds and access capital markets

- changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
- amount and timing of capital expenditures on portfolio assets
- insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvIT such as fire, natural disasters, accidents.
- **Interest Rate Risk:** Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Regulatory/Legal Risk:** REITs and InvITs being new asset classes, rights of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risks associated with segregated portfolio:

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
- Trading in the units of segregated portfolio on the Exchange may be halted because of market conditions, including any halt in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain unchanged.

Risk factors associated with investments in Foreign Securities:

The Scheme may invest in Foreign Securities including overseas debt / equities / ADRs / GDRs with the approval of RBI/SEBI, subject to such guidelines as may be issued by RBI/SEBI. The net assets, distributions and income of the Scheme may be affected adversely by fluctuations in the value of certain foreign currencies relative to the Indian Rupee to the extent of investments in these securities. Repatriation of such investment may also be affected by changes in the regulatory and political environments. Market risks can be greater with respect to political instability, lack of complete or reliable information, market irregularities or high taxation. The Scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates internationally, or the change in the credit profiles of the issuers. The liquidation of securities where investments will be made by the schemes shall be subject to the liquidity / settlement issues of the country of investment / settlement. Non-business days in country of investment / settlement may impact the liquidity of the scheme investments.

The Scheme may, where necessary, appoint advisor(s) for providing advisory services for such investments. The appointment of such advisor(s) shall be in accordance with the applicable requirements of SEBI. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, transaction costs and overseas regulatory costs, the fees of appointed advisor(s). The fees related to these services would be borne by the AMC and would not be charged to the Scheme.

Risk associated with investments in derivatives (including Imperfect Hedging with Investments in Interest Rate Futures (IRFs)):

The Scheme may use various derivative instruments and techniques, permitted within SEBI (Mutual Funds) Regulations, 1996 from time to time including but not limited for portfolio balancing and hedging purpose, which may increase the volatility of Scheme's performance. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives.

Derivative products are specialized instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. **The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.**

The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. There is a possibility that a loss may be sustained by the Scheme as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, interest rates and indices. Even a small price movement in the underlying instrument could have a large impact on their value. This could increase the volatility of the Scheme's performance.

In case of hedge, it is possible that derivative positions may not be perfectly in line with the underlying assets they are hedging. As a consequence the derivative cannot be expected to perfectly hedge the risk of the underlying assets. This also increases the volatility of the Scheme's performance.

Some of the risks inherent to derivatives investments include:

1. **Price Risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
2. **Default Risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
3. **Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset.
4. **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
5. **Liquidity risk:** This risk pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

Risk factors associated with investments in Credit Default Swaps:

Credit default swap is the most common form of credit derivative where the buyer of the swap makes payments to the swap's seller until the maturity date of a contract. In return, the seller agrees that – in the event that the debt issuer defaults or experiences another credit event – the seller will pay the buyer the security's value as well as all interest payments that would have been paid between that time and the security's maturity date. The Scheme may participate in credit Default Swaps (CDS) as a buyer (protection buyer) to hedge/offset credit risk related to fixed income instruments. It is important to note that the credit risk isn't completely eliminated – it has been shifted to the CDS seller. The risk is that the CDS seller defaults at the same time the credit event occurs. In case the debt issuer does not default or no credit event occurs till maturity of CDS contract, the buyer will end up losing money through the payments on the CDS.

Risk factors associated with investments in repo transactions in corporate debt:

The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo transactions, the collateral may be sold, and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

Risk Factors associated with investing in debt instrument securities with special features:

Pursuant to SEBI Circular dated March 10, 2021, the schemes may investment in securities having special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption. Such special features may be available under the Additional Tier I bonds and Tier 2 bonds issued under Basel III framework.

These securities having special features will carry and be subject to all the risks associated with the investment in Fixed Income securities like Credit and Counterparty Risk, Liquidity Risk, Interest Rate Risk etc. However investors are requested to note that as these securities are subordinate to all other Fixed Income securities issued by an issuer and only senior to common equity, such securities with special

features are more riskier than other Fixed Income Securities of the same issuer.

Credit Risk: Where the payout of interest or principal amount is due to be paid by an issuer for senior debt securities and for securities with such special features, such payout for the securities with special features would normally happen only after paying off all the senior debt dues. This increases the risk that the Issuer of the securities with special features may default on interest and /or principal payment obligations and/or default upon violation of covenant(s) and/or delay in scheduled payment(s)

Liquidity Risk: The securities with special features can normally be considered to have limited secondary market liquidity as compared to any senior debt of the issuer, and thus fund manager may be forced to hold such securities with special features till its maturity. Further, where the special features results in trigger and conversion to equity securities, such equity security received by the scheme(s) upon conversion will carry and be subject to all the risks associated with the investment in equity securities.

Risk Factors associated with Securities Lending:

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in a possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk Factors associated with investments in debt instruments having Structured Obligations / Credit Enhancements:

The risks factors stated for debt instruments having Structured Obligations / Credit Enhancements are in addition to the risk factors associated with fixed income instruments:

- Credit rating agencies assign CE rating to an instrument based on any identifiable credit enhancement for the debt instrument issued by an issuer. The credit enhancement could be in various forms and could include guarantee, shortfall undertaking, letter of comfort, etc. from another entity. This entity could be either related or non-related to the issuer like a bank, financial institution, etc. Credit enhancement could include additional security in form of pledge of shares listed on stock exchanges, etc. SO transactions are asset backed/ mortgage backed securities, securitized paper backed by hypothecation of car loan receivables, securities backed by trade receivables, credit card receivables etc. Hence, for CE rated instruments evaluation of the credit enhancement provider, as well as the issuer is undertaken to determine the issuer rating. In case of SO rated issuer, the underlying loan pools or securitization, etc. is assessed to arrive at rating for the issuer
- SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to the credit enhanced nature of CE securities as well as structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold
- The credit risk of debt instruments which are CE rated derives rating is based on the combined strength of the issuer as well as the structure. Hence, any weakness in either the issuer or the structure could have an adverse credit impact on the debt instrument. The weakness in structure could arise due to inability of the investors to enforce the structure due to issues such as legal risk, inability to sell the underlying collateral or enforce guarantee, etc. In case of SO transactions, comingling risk and risk of servicer increases the overall risk for the securitized debt or assets backed transactions. Therefore, apart from issuer level credit risk such debt instruments are also susceptible to structure related credit risk.

In addition to above and to the extent of the corpus of the Scheme investments in certain securities, the Scheme shall be subject to various risk factors including, but not limited to, risks associated with: investments in Fixed Income Securities such as Credit and Counterparty risk, Liquidity risk, Market risk, Interest Rate risk & Re-investment risk etc., investments in securitised debt and investments in liquid funds. The Scheme shall also be subject to other risks including risk associated with inflation, legal risk,

	<p>taxation risk, valuation risk, operational risk & risk factors associated with processing of transaction, in case of investors investing in mutual fund units, through Stock Exchange Mechanism as provided in SID. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. The above are some of the common risks associated with investments in various securities.</p> <p>Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.</p> <p>Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for more details on scheme specific risk factors.</p>										
Risk Control Measures	<p>Investments made by the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. While allocating and choosing securities, the Investment Manager will aim to diversify by gaining broad exposure to different industries and companies in order to reduce risk.</p> <p>Risk Mitigation measures for investments in equity / equity related and debt instruments</p> <ul style="list-style-type: none"> • The Scheme aims to maintain a well-diversified equity portfolio comprising stocks across various sectors of the economy. This shall aid in managing concentration risk and sector specific risks. • The Scheme targets to maintain exposure across different market cap segments - i.e. large, mid-cap and small cap. This shall aid in managing volatility and also improve liquidity. • The Scheme's will strive to mitigate risk through a judicious mix of Debt and Money Market Instruments and equity/ equity related instruments <p>The investments in debt and Money Market instruments would be undertaken after assessing the associated credit risk, interest rate risk and liquidity risk. The AMC shall undertake credit evaluation of each investment opportunity and invest in rated papers of companies having a sound background, strong fundamentals and quality of management and financial strength. Interest Rate Risk	The duration of a portfolio is one of the means of measuring the interest rate risk the portfolio. Hence portfolios with higher duration will have higher interest rate risk. The duration of the Scheme will be actively managed based on prevailing macroeconomics condition, political environment, liquidity position in system, inflationary expectations and other economic considerations.										
Credit Risk	The credit evaluation of the AMC entails evaluation of credit fundamentals of each investment opportunity. Some of the factors that are evaluated inter-alia may include outlook on the sector, parentage, quality of management, and overall financial strength of the credit. The AMC will utilize ratings of recognized rating agencies as an input in the decision making process. To reduce credit risk, the scheme shall invest in debt and money market instruments that have been assigned high investment grade ratings by a recognized rating agency.										
Liquidity Risk	Liquidity risk is the risk of not being able to sell / liquidate a security at short notice at prevailing market prices or without incurring impact cost. Liquidity Risk can be partly mitigated by creating portfolios that are diversified across maturities, ratings, types of securities, etc. in line with the fund objectives, regulations and investment strategy. Volatility Risk	There is the risk of volatility in markets due to external factors like liquidity flow, changes in the business environment, economic policy etc. The Scheme will manage volatility risk through diversification. To that extent, the Volatility risk will be mitigated in the Scheme.										

	Concentration Risk	<p>The AMC will attempt to mitigate this risk by maintaining adequate diversification across issuers/ sectors / instrument type in line with the scheme objectives, investment strategy and applicable regulations. This will also be managed by keeping prudent investment limits on any particular industry or issuer or issuer group based on the size, credit profile, etc. to reduce issuer or industry specific risk.</p> <p>The scheme may utilize derivative instruments for hedging & portfolio balancing purposes. All Interest Rate Swaps will be undertaken with approved counter parties under pre-approved International Swaps and Derivatives Association (ISDA) agreements. The scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI/RBI for the purpose of hedging and portfolio rebalancing.</p> <p>The above risk control measures shall be implemented by the AMC on best effort basis however there can be no guarantee that such measures can completely mitigate the risks involved in Scheme.</p>								
Plans & Options		<p>The Scheme offers following two plans:</p> <ul style="list-style-type: none"> Baroda BNP Paribas Aggressive Hybrid Fund - Regular Plan Baroda BNP Paribas Aggressive Hybrid Fund - Direct Plan <p>Each plan has the following options:</p> <ul style="list-style-type: none"> Growth Option Income Distribution cum Capital Withdrawal (IDCW) Option* <p>The IDCW Option offers Payout and Re-investment facilities. There shall be a single portfolio under the scheme.</p> <p>Direct Plan is meant for direct investments, i.e. for investors who purchase/subscribe to the units of the Scheme directly with the Fund and is not available for investors who route their investments through a Distributor, while Regular Plan is meant for investors who route their investments through distributors only.</p> <p>*Amounts under IDCW option can be distributed out of investors capital (equalization reserve), which is part of sale price that represents realized gains. However, investors are requested to note that amount of distribution under IDCW option is not guaranteed and subject to availability of distributable surplus.</p> <p>Growth Option: The Scheme will not declare any distribution under this option. The income attributable to units under this option will continue to remain invested in the option and will be reflected in the Net Asset Value of Units under this option.</p> <p>IDCW Option: Under IDCW Option, the amount of distribution, if any, shall be declared by Trustees from time to time. The NAV of the unit holders in any of the IDCW options will stand reduced by the amount so distributed and statutory levy, if any, under said IDCW option. The NAV of the Growth Option will remain unaffected.</p> <p>It may be noted that the amount of distribution, if any, under IDCW option will be subject to the availability of distributable surplus as computed in accordance with the SEBI Regulations and discretion of the Trustees/ AMC. There is no assurance or guarantee to unitholders as to the rate of distribution nor that the amounts shall be distributed regularly. The Trustee's/AMC's decision with regards to the rate, timing and frequency of distribution shall be final. The AMC may announce a book closure period for the purpose of distribution of amounts under IDCW option. Amount of distribution, if declared, will be paid to the unit holders appearing in the register of unit holder on the Record Date. To the extent the entire net income and realised gains are not distributed, the same will remain invested in the option and will be reflected in the NAV.</p> <p>Unitholders opting for the IDCW Option may choose to reinvest the amounts to be received by them under IDCW option in additional Units of the said Option. The amount reinvested will be net of tax deducted at source, wherever applicable. The amounts so reinvested shall constitute a constructive payment of the income distribution cum capital withdrawal under IDCW option to the Unitholders and a constructive receipt of the same amount from each Unitholder for reinvestment in Units.</p> <p>Default Plan: The following matrix shall apply for default plan:</p> <table border="1" data-bbox="276 2011 1497 2110"> <thead> <tr> <th>Scenarios</th> <th>Broker Code mentioned by the investor in application form</th> <th>Plan mentioned by the investor in application form</th> <th>Default Plan to apply</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Not mentioned</td> <td>Not mentioned</td> <td>Direct Plan</td> </tr> </tbody> </table>	Scenarios	Broker Code mentioned by the investor in application form	Plan mentioned by the investor in application form	Default Plan to apply	1	Not mentioned	Not mentioned	Direct Plan

As per SEBI circular SEBI/HO/IMD/DF2/CIR/P/2019/42 dated March 25, 2019, inflows of amount upto Rs 2,00,000/- per transaction, by individual investors shall be considered as inflows from 'retail investor'.

Provided that if inflows from such cities is less than the higher of sub clause (i) or sub- clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis.

Provided further that expenses charged under this clause shall be utilised for distribution expenses incurred for bringing inflows from such cities.

The top 30 cities shall mean top 30 cities based on Association of Mutual Funds in India (AMFI) data on 'AUM by Geography - Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

The said additional expenses on account of inflows from beyond top 30 cities so charged shall be clawed back in the scheme, in case the said inflow is redeemed within a period of 1 year from the date of investment.

- Additional expenses under Regulation 52 (6A) (c), not exceeding 0.05% of daily net assets of the scheme.**

** In accordance with SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2018/15 dated February 02, 2018, AMC shall not charge any additional expense of upto 0.05% as per Regulation 52(6A) (c), if exit load is not being levied under the Scheme.

- The AMC may charge GST on investment and advisory service fees ('AMC Fees') which shall be borne by the Scheme in addition to the total expense ratio mentioned in table above;
- @Brokerage and transaction costs includes service tax incurred for the purpose of execution of trade and is included in the cost of investment that shall not exceed 0.12 per cent (12 bps) in case of cash market transactions and 0.05 per cent (5 bps) in case of derivatives transactions.

It is clarified that the brokerage and transaction cost incurred for the purpose of execution of trade may be capitalized to the extent of 12bps and 5bps for cash market transactions and derivatives transactions respectively. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of TER as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

The total expenses charged to the Scheme shall be the maximum limit of TER as prescribed under Regulation 52.

Investors should note that the total recurring expenses of the Scheme excluding issue or redemption expenses, whether initially borne by the Mutual Fund or by the AMC, but including the investment management and advisory fee, shall not exceed the limits as prescribed under Regulation 52 of the SEBI (MF) Regulations. The AMC will charge the Scheme such actual expenses incurred, subject to the statutory limit prescribed in the Regulations.

	<p>For the actual current expenses being charged, the investor should refer to the website of the mutual fund at the following link https://www.barodabnp-paribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes. Any change proposed to the current expense ratio will be updated on the website and communicated to the investors via e-mail or SMS at least three working days prior to the effective date of the change (in accordance with SEBI circular SEBI/HO/IMD/DF2/CIR/P/2018/18 dated February 05, 2018, SEBI Circular SEBI/ HO/IMD/DF2/CIR/P/2018/91 dated June 05, 2018 read with SEBI Circular SEBI/HO/IMD/DF2/CIR/P/2019/42 dated March 25, 2019).
