Data as on November 30, 2024

ABOUT THE FUND

- Baroda BNP Paribas Aggressive Hybrid Fund invests primarily in equity and equity related securities and also in debt and money market instruments to generate income and capital appreciation.
- The fund's strategy seeks to generate income and capital appreciation by taking advantage of diversification by investing in a mix of asset classes comprising equity & equity related instruments and fixed income securities including money market instruments.
- It also aims to manage risk through active selection within the specified asset allocation range. The aim is to improve risk adjusted returns through diversification across these asset classes.
- The equity portion of the portfolio aims to provide long-term capital growth through a diversified and actively managed portfolio of equity and equity related securities.
- The focus would be to build a diversified portfolio of both value and growth companies, all companies selected will be analysed taking into account the business fundamentals, the company's financial strength, industry structure, management quality, future earnings expectations and sensitivity of earnings.
- The debt portion of the portfolio will be actively managed based on the AMC's view on interest rates. The price of fixed income instruments varies with changes in interest rates.
- This fund is suitable for investors looking for the advantage of capital appreciation and low volatility compared to other equity funds along with wealth creation in the long term.

PORTFOLIO POSITIONING

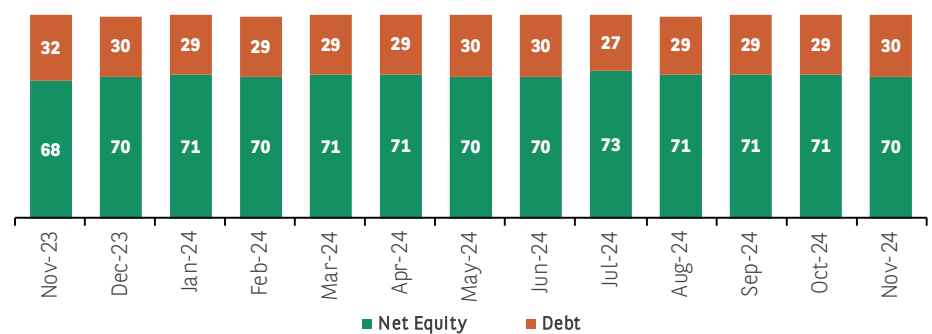

Equity:

- The 65:35 hybrid index fell by -68bps for the month of November after the 386bps fall in October. Though the equity component of the index was up 110bps, the fixed income benchmark corrected to make the index negative for the month.
- The fund ran an equity exposure through November of ~70% - similar to the prior month. Large caps continue to account for nearly 3/4th of the equity exposure while the small and midcap space accounts for the balance.
- Compared to the last month, we have increased exposure to Utilities and Information technology. Exposure has been reduced in Energy and Industrials. We have added ~200bps to our small cap exposures by trimming large and mid-cap exposures.

Debt:

- Looking deeper into November, post US elections and economic releases in US, Japan, China etc. The world markets, be it currency, commodity, equities and bonds, all have had their share of volatilities.
- US yields have been swinging both ways post releases of US economic data points. Reflecting the issues of soaring debt levels, alongside a stronger economy on one side but elevated job less numbers coupled with significantly positive gap between inflation and policy rates on the other side.
- India's GDP growth came at 5.4% y/y in Q2 FY25 vs market expectations ranging between 6.3% -6.5%. The growth rate slowed from 6.7% in Q1 FY25 and long-term trend of 6.6%.
- Indian Yields rallied by 8-10bps across the curve on expectation of CRR cut and easing of monetary policy in December.
- The scheme maintains short to medium duration with allocations to various tenors of Gsecs and corporate bonds (across rating curve) along with money market instruments depending on the interest rate view and credit spreads.
- Additionally, we have allocated a small amount in REITS, INVITS with an intention to generate alpha over debt returns from a medium-term perspective.
- We have also allocated small % in AAA PTC to generate Alpha.
- We will maintain duration in the range of 3yr-4yr years basis current interest rate view and fund mandate.
- The scheme remains open to tactical duration calls.

Income Distribution cum Capital Withdrawal (IDCW) HISTORY (Regular Plan - IDCW Option)

Record Date	Distribution Rate Per Unit (₹) Individual/ others	Cum--IDWC NAV (₹)
27-Aug-2024	0.14	18.42
27-Sep-2024	0.14	18.84
29-Oct-2024	0.14	17.81

Last 3 IDCW declared for IDCW option.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of pay-out and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors' capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.** The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit. Face value may change depending upon FV of the scheme.

Baroda BNP Paribas Aggressive Hybrid Fund
(An Open ended Hybrid Scheme investing predominantly in equity and equity related instruments)
This product is suitable for investors who are seeking*:

- ▶ Wealth creation in long term.
- ▶ Investment primarily in equity & equity-related securities and the rest in debt securities & money market instruments to generate income and capital appreciation.

Scheme Riskometer^^

Investors understand that their principal will be at Very High risk.

Benchmark (Tier 1) Riskometer^^

Benchmark riskometer is at Very High risk.

^^Riskometer For Scheme: basis It's portfolio. For Benchmark (CRISIL Hybrid 35+65 - Aggressive Index): basis It's constituents; as on November 30, 2024.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

DISCLAIMERS

Debt Quants - The information contained in this report has been obtained from sources considered to be authentic and reliable. The quantitative data does not purport to be an offer for purchase and sale of mutual fund units.

#Key Statistical Ratios - The information contained in this report has been obtained from sources considered to be authentic and reliable. This quantitative data does not purport to be an offer for purchase and sale of mutual fund units. The risk free rate of return considered for calculation of Sharpe ratio is 6.75%, as per 1 day MIBOR rate on the last business day of the month. Sharpe Ratio (annualised), Standard Deviation (annualised) and Beta are based on last 36 monthly data points. Information ratio aims to show consistency in generating excess returns relative to benchmark, which is measured by the tracking error. Tracking error is the measure of the deviation from the benchmark.

Portfolio Positioning, Top 10 Sectors/Stocks - details contained herein is for general information purposes only and does not indicate assurance of future Scheme performance. The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme please refer to SID available on our website (www.barodabnp-paribasmf.in).

NAV Movement (Rs. 10,000 Invested at Inception) - All returns are for Regular Plan - Growth Option. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Returns do not take into account the load and taxes, if any.

SIP Performance - Returns do not take into account the load and taxes, if any. The data assumes investments in Regular Plan - Growth option. % CAGR Returns are computed after accounting for the cash flow by using the XIRR method (investment internal rate of return). The above investment simulation is for illustrative purpose only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC/ Mutual fund is not guaranteeing or forecasting or promising any return. SIP does not assure a profit or guarantee protection against loss in a declining market.

IDCW History - Past performance may or may not be sustained in future and is not a guarantee of any future returns. Pursuant to payment of IDCW, the NAV of the Scheme has fallen to the extent of IDCW distribution and statutory levy (if any). Declaration of IDCW is subject to the availability of distributable surplus under the Option and there is no assurance or guarantee to Unit holders as to the rate of IDCW distribution nor will that dividend be paid regularly. The above IDCW are on face value of ₹ 10 per unit.

Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization

Concept of Macaulay duration - The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

The risks associated with investments in equities include fluctuations in prices, as stock markets can be volatile and decline in response to political, regulatory, economic, market and stock-specific development etc. Please refer to Scheme Information Document for detailed Risk Factors, asset allocation, investment strategy etc. The material contained herein has been prepared without regard to the individual financial circumstances and objectives of persons who receive it.
