These may be taken to hedge or rebalance the portfolio, or to undertake any other strategy as may be permitted under the Regulations from time to time.				
The Scheme will not invest in foreign securitized debt.				

	<p>Gross equity exposure will be maintained between 65% to 90% and the net long equity exposure will be between 0% to 50%. The Scheme may take derivatives positions up to 50% of the Equity assets of the Scheme, based on the opportunities available, subject to the guidelines issued by SEBI from time to time, and in line with the overall investment objective of the Scheme. These may be taken to hedge or rebalance the portfolio, or to undertake any other strategy as may be permitted under the Regulations from time to time.</p> <p>The Scheme may undertake repo transactions in corporate debt securities in accordance with the directions issued by SEBI / RBI from time to time and in line with the policy approved by the Board of Directors of the AMC and Trustee Company.</p> <p>The Scheme may invest in Foreign Securities upto 25% of its net assets subject to maximum of US\$ 1 billion on in the aggregate at the Mutual Fund level, as per the SEBI circular nos. SEBI/IMD/CIR No.7/104753/07 dated September 26, 2007, SEBI/IMD/CIR no. 2 / 122577 / 08 dated April 8, 2008, SEBI/HO/IMD/DF3/CIR/P/2020/225 dated November 05, 2020 and SEBI/HO/IMD/IMD-II/DOF3/P/CIR/2021/571 dated June 03, 2021, as may be amended from time to time.</p> <p>The cumulative gross exposure through equity, debt, derivative positions, repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by SEBI from time to time (subject to prior approval from SEBI, if any) will not exceed 100% of the net assets of the scheme. However, cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.</p> <p>Pending deployment of funds of the Scheme in securities in terms of the investment objective, the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as amended from time to time.</p> <p>The Scheme may engage in securities lending accordance with the framework relating to securities lending and borrowing specified by SEBI. The Scheme shall adhere to the following limits should it engage in stock lending :</p> <ol style="list-style-type: none"> 1. Not more than 20% of the net assets of the Scheme can be deployed in stock lending. 2. Not more than 5% of the net assets of the Scheme can be deployed in stock lending to any single counter party. <p>The Scheme may not be able to sell such lent out securities and this can lead to temporary illiquidity.</p> <p>The Scheme retains the flexibility to invest across all securities in the debt and money markets as permitted by SEBI / RBI from time to time. In addition to the instruments stated in the above table, the Scheme may enter into reverse repos in government securities as may be permitted by SEBI and RBI and in Tri-Party Repo in line with relevant RBI regulations.</p> <p>The Scheme may undertake/invest/engage in Credit Default Swaps (CDS) transactions. In accordance with SEBI Circular No. CIR/IMD /DF/23/2012 dated November 15, 2012, exposure to a single counterparty in CDS transactions shall not exceed 10% of the net assets of the scheme.</p> <p>The Scheme may invest upto 10% of the debt portfolio of the Scheme in debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a prespecified event for loss absorption.</p> <p>The Scheme may invest in debt securities having structured obligations (SO rating) and/or credit enhancements (CE rating) upto 10% of the debt portfolio of the scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio.</p>
Investment Strategy	The Scheme has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market

	<p>securities, while attempting to manage risk from the market through active asset allocation. In order to achieve this process, the Scheme will follow a top-down and bottom-up strategy.</p> <p>The AMC has built a proprietary model for asset allocation based on the valuations and fundamentals of the companies. The asset allocation between equity and debt will be determined by the model and the top-down process will help in deciding the sector allocation while the bottom up process would lead to construction of the portfolio using specific securities.</p> <p>The model will be revisited if needed, and adjustments made if needed, to ensure that the outcomes remain relevant to the market environment. The model would be run on monthly basis to decide the asset allocation. Generally, once the allocation is fixed, it will not be changed till the next month except in case of extraordinary situations where extreme volatility in the markets would force a change in asset allocation.</p> <p>Though the Scheme would ensure adherence to the overall investment exposure limits defined by SEBI for the scheme category, it retains the flexibility to deviate from the equity and debt exposures as provided by the proprietary model, depending on the market conditions, market opportunities, applicable regulations and political and economic factors.</p> <p>Equity allocation based on the model The gross equity exposure will be maintained in the range of 65% to 90% while the net equity exposure will be maintained between 0% to 50%. The difference between gross and net variation would generally be invested in arbitrage or in arbitrage equity mutual funds. The model would follow the matrix approach for asset allocation based on different parameters.</p> <p>Fixed Income allocation based on the model The exposure to Debt & Money Market Instruments including cash and cash equivalents will be maintained in the range of 10% to 35%. The model would follow the matrix approach for asset allocation based on different parameters.</p> <p>Once the asset allocation has been decided based on the model, the portfolio would be constructed based on top-down as well as bottomup approach using our core principle of investing, GARP (Growth at a Reasonable Price). The Scheme retains the flexibility to deviate from the asset allocation model, depending on the market conditions, market opportunities, applicable regulations and political and economic factors.</p>
Risk Profile of the scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Standard Risk Factors</p> <ul style="list-style-type: none"> - Investments in mutual fund units involves investment risks such as market risk, credit & default risk, liquidity risk, trading volumes, settlement risk, including the possible loss of principal. - As the price/ value/ interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down. The various factors which impact the value of the scheme's investments include, but are not limited to, fluctuations in the stock markets, bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the companies and issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc. - Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee future performance of the scheme. - Baroda BNP Paribas Equity Savings Fund is the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects and returns. - The sponsor / associates are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 10,00,000/- (Rupees ten lakhs only) to the corpus of the Mutual Fund made by it towards setting up the Fund. - The present scheme is not a guaranteed or assured return scheme. <p>The Scheme specific risk factors are summarized as follows:</p>

Market Risk: All mutual funds and securities investments are subject to market risk and there can be no assurance / guarantee that the scheme's objectives will be achieved. The securities that the scheme invests in would be exposed to price changes on a day-to-day basis. These price changes may occur due to instrument-specific factors as well as general macroeconomic conditions.

Markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. The scheme may be subject to price volatility due to factors such as interest sensitivity, market perception, and creditworthiness of issuer and market liquidity.

Different parts of the market can react differently to these developments. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

Concentration Risk:

The scheme may pursue only a limited degree of diversification. It may invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) or be concentrated on a few market sectors. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

Scheme specific risk factors:

Risks associated with investing in equity and equity related instruments:

Investments in equity and equity related instruments are volatile and prone to price fluctuations on a daily basis. The impact of fluctuations is likely to be accentuated for short-term investments. The risk that the performance of one or more companies declines or stagnates may have a negative impact on the performance of the Scheme as a whole at any given time. Investments in equity and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio

Risk Factors associated with Investments in Derivatives

The Scheme(s) may use various derivative instruments and techniques, permitted within SEBI (Mutual Funds) Regulations, 1996 from time to time including but not limited for portfolio balancing and hedging purpose, which may increase the volatility of Scheme's performance. Usage of derivatives will expose the Scheme(s) to certain risks inherent to such derivatives.

Derivative products are specialized instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. There is a possibility that a loss may be sustained by the Scheme(s) as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, interest rates and indices. Even a small price movement in the underlying instrument could have a large impact on their value. This could increase the volatility

of the Scheme's performance.

In case of hedge, it is possible that derivative positions may not be perfectly in line with the underlying assets they are hedging. As a consequence the derivative cannot be expected to perfectly hedge the risk of the underlying assets. This also increases the volatility of the Scheme's performance. Some of the risks inherent to derivatives investments include:

1. **Price Risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
2. **Default Risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
3. **Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset.
4. **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
5. **Liquidity risk:** This risk pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

Risks associated with Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in a possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk factors specific to investments in foreign securities:

The Scheme may invest in Foreign Securities including overseas debt / equities / ADRs / GDRs with the approval of RBI/SEBI, subject to such guidelines as may be issued by RBI/SEBI. The net assets, distributions and income of the Scheme may be affected adversely by fluctuations in the value of certain foreign currencies relative to the Indian Rupee to the extent of investments in these securities. Repatriation of such investment may also be affected by changes in the regulatory and political environments. Market risks can be greater with respect to political instability, lack of complete or reliable information, market irregularities or high taxation. The Scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates internationally, or the change in the credit profiles of the issuers. The liquidation of securities where investments will be made by the schemes shall be subject to the liquidity / settlement issues of the country of investment / settlement. Non-business days in country of investment / settlement may impact the liquidity of the scheme investments

The Scheme may, where necessary, appoint advisor(s) for providing advisory services for such investments. The appointment of such advisor(s) shall be in accordance with the applicable requirements of SEBI. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, transaction costs and overseas regulatory costs, the fees of appointed advisor(s). The fees related to these services would be borne by the AMC and would not be charged to the Scheme.

Risk factors associated with investments in REITs and InvITs

- **Price Risk / Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates and the resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events etc. REITs & InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the portfolio assets
- **Liquidity Risk:** As the liquidity of the investments made by the scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. Further, there is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists
- **Risk of lower than expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/InvIT receives as dividends or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate based on, among other things:
 - success and economic viability of tenants and off-takers
 - economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - force majeure events related such as earthquakes, floods etc. rendering the portfolio assets inoperable
 - debt service requirements and other liabilities of the portfolio assets
 - fluctuations in the working capital needs of the portfolio assets
 - ability of portfolio assets to borrow funds and access capital markets
 - changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
 - amount and timing of capital expenditures on portfolio assets
 - insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvIT such as fire, natural disasters, accidents.
- **Interest Rate Risk** - Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Regulatory/Legal Risk:** REITs and InvITs being new asset classes, rights of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risks associated with repo transactions in corporate debt

The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo

transactions, the collateral may be sold, and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

Risk factors associated with investments in Credit Default Swaps:

Credit default swap is the most common form of credit derivative where the buyer of the swap makes payments to the swap's seller until the maturity date of a contract. In return, the seller agrees that – in the event that the debt issuer defaults or experiences another credit event – the seller will pay the buyer the security's value as well as all interest payments that would have been paid between that time and the security's maturity date. The Scheme may participate in credit Default Swaps (CDS) as a buyer (protection buyer) to hedge/offset credit risk related to fixed income instruments. It is important to note that the credit risk isn't completely eliminated – it has been shifted to the CDS seller. The risk is that the CDS seller defaults at the same time the credit event occurs. In case the debt issuer does not default or no credit event occurs till maturity of CDS contract, the buyer will end up losing money through the payments on the CDS.

Risks for writing covered call options for equity shares:

1. Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares. Being a covered call, the downside risk is not unlimited, but limited to the extent of change in the price of underlying security held by the Fund.
2. The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.
3. The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
4. The total gross exposure related to option premium paid and received shall not exceed the regulatory limits of the net assets of the scheme.

Risks associated with segregated portfolio:

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
- Trading in the units of segregated portfolio on the Exchange may be halted because of market conditions, including any halt in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain unchanged.

Risk Factors associated with investing in debt instrument securities with special features:

Pursuant to SEBI Circular dated March 10, 2021, the schemes may investment in securities having special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption. Such special features may be available under the Additional Tier 1 bonds and Tier 2 bonds issued under Basel

	<p>III framework.</p> <p>These securities having special features will carry and be subject to all the risks associated with the investment in Fixed Income securities like Credit and Counterparty Risk, Liquidity Risk, Interest Rate Risk etc. However investors are requested to note that as these securities are subordinate to all other</p> <p>Fixed Income securities issued by an issuer and only senior to common equity, such securities with special features are more riskier than other Fixed Income Securities of the same issuer.</p> <p>Credit Risk : Where the payout of interest or principal amount is due to be paid by an issuer for senior debt securities and for securities with such special features, such payout for the securities with special features would normally happen only after paying off all the senior debt dues. This increases the risk that the Issuer of the securities with special features may default on interest and /or principal payment obligations and/or default upon violation of covenant(s) and/or delay in scheduled payment(s)</p> <p>Liquidity Risk : The securities with special features can normally be considered to have limited secondary market liquidity as compared to any senior debt of the issuer, and thus fund manager may be forced to hold such securities with special features till its maturity. Further, where the special features results in trigger and conversion to equity securities, such equity security received by the scheme(s) upon conversion will carry and be subject to all the risks associated with the investment in equity securities.</p> <p><u>Risk Factors associated with investments in debt instruments having Structured Obligations / Credit Enhancements:</u></p> <p>The risks factors stated for debt instruments having Structured Obligations / Credit Enhancements are in addition to the risk factors associated with fixed income instruments:</p> <ul style="list-style-type: none"> • Credit rating agencies assign CE rating to an instrument based on any identifiable credit enhancement for the debt instrument issued by an issuer. The credit enhancement could be in various forms and could include guarantee, shortfall undertaking, letter of comfort, etc. from another entity. This entity could be either related or non-related to the issuer like a bank, financial institution, etc. Credit enhancement could include additional security in form of pledge of shares listed on stock exchanges, etc. SO transactions are asset backed/ mortgage backed securities, securitized paper backed by hypothecation of car loan receivables, securities backed by trade receivables, credit card receivables etc. Hence, for CE rated instruments evaluation of the credit enhancement provider, as well as the issuer is undertaken to determine the issuer rating. In case of SO rated issuer, the underlying loan pools or securitization, etc. is assessed to arrive at rating for the issuer • SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to the credit enhanced nature of CE securities as well as structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold. • The credit risk of debt instruments which are CE rated derives rating is based on the combined strength of the issuer as well as the structure. Hence, any weakness in either the issuer or the structure could have an adverse credit impact on the debt instrument. The weakness in structure could arise due to inability of the investors to enforce the structure due to issues such as legal risk, inability to sell the underlying collateral or enforce guarantee, etc. In case of SO transactions, comingling risk and risk of servicer increases the overall risk for the securitized debt or assets backed transactions. Therefore apart from issuer level credit risk such debt instruments are also susceptible to structure related credit risk. <p>In addition to above and to the extent of the corpus of the Scheme investments in certain securities, the Scheme shall be subject to various risk factors including, but not limited to, risks associated with: investments in Fixed Income Securities such as Credit and Counterparty risk, Liquidity risk, Market risk, Interest Rate risk & Re-investment risk etc., investments in securitised debt and investments in liquid funds. The Scheme shall also be subject to other risks including risk associated with inflation, legal risk, taxation risk, valuation risk, operational risk & risk factors associated with processing of transaction, in case of investors investing in mutual fund units,</p>
--	---

	<p>through Stock Exchange Mechanism as provided in SID.</p> <p>Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. The above are some of the common risks associated with investments in various securities.</p> <p>Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.</p> <p>Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for more details on scheme specific risk factors.</p>
Risk Control Measures	<p>Investments made by the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. While allocating and choosing securities, the Investment Manager will aim to diversify by gaining broad exposure to different industries and companies in order to reduce risk.</p> <p>Risk Mitigation measures for investments in equity / equity related instruments</p> <ul style="list-style-type: none"> • The Scheme aims to maintain a well-diversified equity portfolio comprising stocks across various sectors of the economy. This shall aid in managing concentration risk and sector specific risks. • The Scheme targets to maintain exposure across different market cap segments - i.e. large, mid-cap and small cap. This shall aid in managing volatility and also improve liquidity. • The Scheme's will strive to mitigate risk through a judicious mix of Debt and Money Market Instruments and equity/ equity related instruments <p>The scheme may utilize derivative instruments for hedging & portfolio balancing purposes. All Interest Rate Swaps will be undertaken with approved counter parties under pre-approved International Swaps and Derivatives Association (ISDA) agreements. The scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI/RBI for the purpose of hedging and portfolio rebalancing.</p> <p>The above risk control measures shall be implemented by the AMC on best effort basis however there can be no guarantee that such measures can completely mitigate the risks involved in Scheme.</p>
Plans & Options	<p>The Scheme offers two Plans thereunder, viz. Regular and Direct.</p> <p>Direct Plan is meant for direct investments, i.e. for investors who purchase/subscribe to the units of the Scheme directly with the Fund and is not available for investors who route their investments through a Distributor, while Regular Plan is meant for investors who route their investments through distributors only. Both Plans have a common portfolio but Direct Plan has a lower expense ratio on account of absence of brokerage and commission. Hence both Plans have distinct NAVs.</p> <p>Each of the Plans have the following options:</p> <ol style="list-style-type: none"> A. Growth Option (default option in case no option specified by investor); B. Income Distribution Cum Capital Withdrawal Option ("IDCW") Option <ol style="list-style-type: none"> a. Payout of IDCW; b. Re-investment of IDCW (default sub-option in case no sub-option specified by investor). <p>If the IDCW under the Payout Option of the Scheme is less than or equal to Rs. 200, it will, by default, be reinvested under the Reinvestment suboption.</p> <p>IDCW stands for 'Income Distribution cum Capital Withdrawal option'. The amounts can be distributed out of investors' capital (Equalization Reserve), which is part of the sale price that represents realized gains, (subject to the availability of distributable surplus as calculated in accordance with the Regulations).</p>

However, investors are requested to note that amount of distribution under IDCW option is not guaranteed and subject to availability of distributable surplus.

Investors are requested to note that, pursuant to SEBI circular no. SEBI/HO/IMD/DF3/CIR/P/2020/194 dated October 05, 2020 the nomenclature of the "Dividend Option(s) / Sub-option(s)" offered under all the existing schemes of the Fund has been renamed with effect from April 01, 2021.

Default Plan:

The following matrix shall apply for default plan:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct	Direct Plan
3	Not mentioned	Regular Plan	Direct Plan
4	Mentioned	Direct	Direct Plan
5	Direct	Not mentioned	Direct Plan
6	Direct	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall endeavor to obtain the correct ARN code within 30 calendar days of the receipt of the application form, from the investor/ distributor. In case, the correct code is not received within 30 calendar days (remediation period), the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load subject to following exceptions:

- Such re-processing **shall not** be carried out in case of already redeemed units. i.e. re-processing shall only be carried out for balance units as maybe available after 30 calendar days.
- Any subsequent switch-out or STP (transfer out) request for units allotted under wrong/ invalid/ incomplete ARN codes **shall not** be processed unless:
 - Such switch or STP request is for 'switching-in' to direct plan of target scheme / same scheme, as maybe applicable or
 - Correct ARN code is provided and verified by AMC/Mutual Fund, to its satisfaction, prior to processing of such switch request or registration of STP request.
- In case of SIP transaction, the above time period for remediation shall be applicable from first installment/registration only. In case correct ARN code is not provided within 30 calendar days of such first installment, re-processing shall be carried out and subsequent SIP triggers shall happen in Direct Plan.
- Notwithstanding any of the clauses as above, re-processing **shall not** be carried out, for units allotted under wrong/ invalid/ incomplete ARN codes under IDCW option, in case any amount for distribution has been declared during the aforesaid remediation period of 30 calendar days.
- Subject to above, once the units are re-processed under Direct Plan, no submission of correct ARN code shall be accepted by AMC for such re-processed units.
- Investors are requested to note that pursuant to such re-processing, the number of units to the credit of such investors may change and AMC / Mutual Fund/ Trustees /Sponsors shall not be liable for any loss that may occur to investors/distributors or any scheme of Mutual Fund consequent to such re-processing.
- Investors are strongly advised to provide the correct ARN codes in case they wish to subscribe to units of the Scheme under Regular Plan.**

Default Option/Facility:

If an investor does not clearly specify choice of option at the time of investing, it will be considered as Growth Option. Likewise, no facility viz. dividend payout or dividend re-investment is opted by the investor, then dividend re-investment will be considered as default.

Provided that if inflows from such cities are less than the higher of (i) or (ii) above, such expenses on the daily net assets of the Scheme shall be charged on a proportionate 	

basis. Provided further that the expenses charged under this provision shall be utilised for distribution expenses incurred for bringing inflows from such cities. Provided further that the amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment. Additional TER will be charged based on inflows only from retail investors (other than corporates and institutions) from B-30 cities. As per SEBI circular dated March 25, 2019, inflows of amount upto Rs. 2,00,000/- per transaction, by individual investors from B-30 cities, shall be considered as inflows from retail investors.

- c) additional expenses, incurred towards different heads, not exceeding 0.05% of the daily net assets of the Scheme. However, such expenses will not be charged if exit load is not levied / not applicable to the Scheme.

Investors may note that GST on investment and advisory fees may be charged to the Scheme in addition to the maximum limit of TER as mentioned in the table above. GST on expenses other than investment and advisory fees, if any, shall be borne by the Scheme within the maximum limit of TER as mentioned in the table above. GST on brokerage and transaction costs paid for execution of trade, if any, shall be within the limit prescribed under Regulation 52 of the SEBI Regulations.

For the actual current expenses being charged, the investor should refer to the website of the mutual fund at the following link <<https://www.barodabnp-paribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes>>. Any change proposed to the current expense ratio will be updated on the website and communicated to the investors via e-mail or SMS at least three working days prior to the effective date of the change (in accordance with SEBI circular SEBI/HO/IMD/DF2/CIR/P/2018/18 dated February 05, 2018, SEBI Circular SEBI/HO/IMD/DF2/CIR/P/2018/91 dated June 05, 2018 read with SEBI Circular SEBI/HO/IMD/DF2/CIR/P/2019/42 dated March 25, 2019). Further, the disclosure of the expense ratio on a daily basis shall also be made on the website of AMFI viz. www.amfiindia.com.

Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC or by the Trustee or Sponsor.

Actual expenses for the financial year 2021-22:

Total recurring expense as a % to daily net assets :

- Regular Plan – 2.34 %
- Direct Plan – 1.26 %

An Illustration of impact of expense ratio on Scheme's returns:

If an investor A invests in a regular plan of a Scheme with an expense of 2% p.a. and an investor B invests in Direct Plan of the same scheme with an expense of 1% p.a. Assuming the gross return of this fund is 10% for that given year, investor A will make a return of 8% (post expense) for that year, whereas investor B will make 9% return for same period.

Also, please take a look at below illustration which shows impact of different expense ratio assumed on initial investment of Rs. 10,000 invested over period of 10 years with an average annualized gain of 10% p.a.

Quarterly Systematic Investment Facility (QSIF): Minimum INR 1500 and in multiples of INR 1 thereafter per installment for a minimum of 4 Installments
For Baroda BNP Paribas ELSS Fund: Minimum INR 500 and in multiples of INR 500 thereafter per installment. Minimum Installments for DSIP, WSIF, MSIF will be 6 installments and for QSIF 4 installments

Accordingly, the provision of criteria of Minimum Application Amount of the scheme shall not apply to such applications using the SIP facility.
- Applicable Load Structure for SIP**

Entry Load: Nil
The provisions of Exit Load as applicable to the normal investments as on the date of Registration will be applicable to fresh SIP investments.
- Separate SIP Registration Forms are required to be filled for DSIP, WSIF, MSIF and QSIF.
- Investors have the right to discontinue the SIP facility at any time by sending a written request to any of the Official Points of Acceptance of Transactions. Such notice should be received at least 14 days prior to the due date of the next cheque. On receipt of such request, the SIP facility will be terminated.
- The registration period of SIP will be as per the instruction given by the investor. In case the SIP is selected for a Perpetual period investors will have to submit SIP cancellation request to discontinue the SIP. In case of any ambiguity in registration period or if the end date of SIP is not mentioned, the default period for SIP will be perpetual.
- In case investor has not selected any frequency or in case of any ambiguity, monthly frequency shall be considered as default option. Similarly, 7th day shall be considered as default Trigger date. In case of any ambiguity in the enrolment form, the SIP registration request shall be liable to be rejected.
- In case of minor application, AMC will register standing instructions till the date of the minor attaining majority, though the instructions may be for a period beyond that date. Prior to minor attaining majority, AMC shall send advance notice to the registered correspondence address advising the guardian and the minor to submit an application form along with prescribed documents to change the status of the account to "major". The account shall be frozen for operation by the guardian on the day the minor attains the age of majority and no fresh transactions shall be permitted till the documents for changing the status are received.
- The Trustee / AMC reserves the right to change / modify the terms of the SIP.
- If no start date is mentioned by the investors, the SIP will be registered to start from a period after 30 days from the date of submission of the application form.
- DSIP shall be triggered and processed on all Business Days only.
- Investors can choose any preferred date of the month as SIP debit date. In case the chosen date falls on a non-business day, the SIP will be processed on the immediate next business day. In case chosen date is not available in a particular month, the SIP will be processed on the last business day of the month.
- The SIP will be discontinued automatically if payment is not received for three successive instalments
- The amount mentioned on the first cheque should be equal to the combined SIP instalment amount mentioned against all the Schemes in the Form. Accordingly, the first cheque amount will get invested in multiple Schemes as mentioned in the form. In case of mismatch, the transaction is liable to be rejected. Further, investor should ensure that the amount mentioned on the OTM is equal to the total consolidated amount across all schemes mentioned as per the form
- If a Micro SIP application is found such that the registration of the application will result in the aggregate of all investments made by the investor in a financial year exceeding Rs. 50,000 or where there is any deficiency in the application form or any supporting document In case the first Micro SIP instalment is processed (as the cheque may be banked), and the application / supporting document is found to be defective, such Micro SIP will be ceased for future instalments. No refunds shall be made for the units already allotted. Investor, can however, redeem the units if so desired.
- The investor will not hold Baroda BNP Paribas Mutual Fund, its registrars and other service providers responsible if the transaction is delayed or not effected or the investor bank account is debited in advance or after the specific SIP date due to various clearing cycles of NACH Debit/ Local/Bank holiday. Baroda BNP Paribas Mutual Fund, its registrars and other service providers shall not be held responsible or liable for damages / compensation / loss incurred by the investor as a result of using the SIP NACH / Direct Debit facility. The investor assumes the entire risk of using this facility and takes full responsibility.

The terms and conditions for availing the "Top-Up SIP" shall be as follows:
