**Note on Segregated Portfolio:** Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular- Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had filed a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio

\*\*\*Kindly note that with effect from September 11, 2024, Baroda BNP Paribas Medium Duration Fund ("Merging Scheme") has merged into Baroda BNP Paribas Credit Risk Fund ("Surviving Scheme"). The segregated portfolio under the merging scheme is now under the surviving scheme.

## ABOUT THE FUND

Baroda BNP Paribas Credit-risk fund is a debt fund which have at least 65% of their investments in AA (excluding AA+) and below rated corporate bonds. The fund aims to generate high returns by taking higher credit risks and invest in lower-rated papers. This fund invests based on short to medium term interest rate view and shape of the yield curve. They typically maintain a moderate duration of up to 2 years and invests in well researched credits / structures for yield enhancement. The fund looks for opportunities in the fixed income segment across varying interest rates cycle. Investing in such funds aims to give investors the benefit of generating income in both rising and falling interest rate environment. The fund has adequate exposure towards AAA bonds, G-Sec & money market instruments for ensuring liquidity.

## PORTFOLIO POSITIONING

- India's credit growth slowed to 11.5% in Oct compared to 13% in Sep -24. Meanwhile deposit growth increased to 11.7% in Oct 24 from 11.5% in Sep -24.
- The increase in Deposit growth rate and a simultaneous slowdown in credit growth has narrowed the credit deposit growth gap.
- Overall, the upgrade-downgrade ratios published by all the rating agencies show case favourable juncture in the credit cycle as the fundamental macros stay intact. These are also reflected in the substantial improvement in the NPA numbers reported by the financial system.
- The financial regulator has also been doing a credible job of regulating the vulnerable segments with sufficient warnings/alerts on time basis. This should eventually ensure a much more stable credit cycle.
- With the continuous updates in the regulations of the NBFC's, the NBFCs in general are facing the challenge of higher capital cost however their growth remains resilient. These companies are diversifying their borrowing for low and better spread and able to control the NPAs even though there are early signs of deterioration of asset quality.
- As mandated, we remain invested approx. ~60%-65% in good quality AA assets.
- We intend to maintain Average duration between 2.40 - 2.75 years.
- The scheme remains open to tactical duration calls.

### DISCLAIMERS

**+Concept of Macaulay duration** - The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.
