Load Structure

Exit Load: Redeemed or switched out from the date of allotment

Upto 30 days: If units of the Scheme are redeemed or switched out within 30 days of the date of allotment - 1% of the applicable Net Asset Value (NAV)

After 30 days: Nil

For detailed load structure please refer Scheme Information Document of the scheme.

*The scheme is a 'Transferee Scheme', and accordingly, the ratios are being provided considering the weighted average NAVs of both the Transferor Scheme and Transferee Scheme.

*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable.

Data as on January 31, 2025

ABOUT THE FUND

- Baroda BNP Paribas Large cap funds typically invest in blue chip companies and market leaders which are expected to generate revenue and earnings due to their established businesses and tenure.
- These companies being seasoned and large corporate houses, are expected to withstand market cycles. Mid or small cap companies do not have the same level of stability and therefore carry a higher degree of risk than large caps.
- Baroda BNP Paribas Large Cap Fund invests predominantly in such large capitalisation companies which has a proven track record of growth in the long term.
- The Scheme intends to be well diversified across sectors and intends to focus on quality names exhibiting sound management and fundamentals with sustainable earnings growth potential.
- The Scheme is suitable for investors who have a long term investment horizon.

WHY LARGE CAP?

- Large-cap funds are equity funds that invest in relatively stable companies (top 100 companies listed on the stock exchange).
- Owing to the high degree of stability of the underlying equity stocks, large cap funds have lower risks compared to mid and small caps making them an ideal investment option for both new and seasoned investors.
- Large cap companies are leaders in their respective industries and tend to provide relatively stable returns over longer periods.
- These companies owing to their large capital are likely to pay off debt on time, withstand the market turmoil and have a good debt-to-equity ratio.

PORTFOLIO POSITIONING

- The month of January 2025 we saw a fairly contained loss in the large cap indices at 170 basis point versus the mid & small cap indices which fell over 500 basis point for the month. Rising dollar strength meant continuing outflows from emerging markets. The weaker GDP estimates for 2Q and 3Q should be mitigated with the improving trend of government capex.
- The fund maintained its investment levels at -94.3% - like the prior month. Our large cap exposures are marginally down 170 basis point at -84.1% with the balance in the small and mid-cap space.
- Over the course of the month, we undertook some shuffling on our exposures wherein we trimmed some exposures on consumer discretionary and utilities and predominantly added to weaker INR plays like IT. We also added marginally to industrials and telecom selectively.
- Our underweights remain on financials and materials though we have cut our underweight on financials marginally.
- Key overweight positions are Consumer Discretionary (mainly through consumer services), Health Care and industrials (post the addition during the month).

CURRENT MARKET CAP (% of Net Assets)

TOP 5 SECTORS

TOP 5 STOCKS*

Top 5 Stocks (% to net assets) have been considered as of the latest month end

The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). DISCLAIMERS

Key Statistical Ratios - The information contained in this report has been obtained from sources considered to be authentic and reliable. This quantitative data does not purport to be an offer for purchase and sale of mutual fund units. The Standard Deviation is used to measure the volatility of returns. Sharpe Ratio is the measure of the risk - adjusted performance. Beta is the measure of the portfolio's volatility to its respective benchmark. The risk free rate of return considered for calculation of Sharpe ratio is 6.75%, as per 1 day MIBOR rate on the last business day of the month. Sharpe ratio, Volatility/Standard deviation is annualised based on 36 monthly data points. Beta is based on last 36 monthly data points. Information ratio aims to show consistency in generating excess returns relative to benchmark, which is measured by the tracking error. Tracking error is the measure of the deviation from the benchmark.

Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization

Portfolio Positioning, Top 5 Sectors/Stocks - details contained herein is for general information purposes only and does not indicate assurance of future Scheme performance. The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme please refer to SID available on our website (www.barodabnp-paribasmf.in).

NAV Movement (Rs. 10,000 Invested at Inception) - All returns are for Regular Plan - Growth Option. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Returns do not take into account the load, if any.

SIP Performance - Returns do not take into account the load and taxes, if any. The data assumes investments in Regular Plan - Growth option. % CAGR Returns are computed after accounting for the cash flow by using the XIRR method (investment internal rate of return). the above investment simulation is for illustrative purpose only and should not be construed as a promise on minimum returns and safeguard of capital. the AMC/ Mutual fund is not guaranteeing or forecasting or promising any return. SIP does not assure a profit or guarantee protection against loss in a declining market.

*For detailed Portfolio holdings please refer to the Factsheet <https://www.barodabnp-paribasmf.in/downloads/monthly-factsheet>

The risks associated with investments in equities include fluctuations in prices, as stock markets can be volatile and decline in response to political, regulatory, economic, market and stock-specific development etc. Please refer to Scheme Information Document for detailed Risk Factors, asset allocation, investment strategy etc.
