In the event of such a deviation, the fund manager will rebalance the portfolio within 30 days from the date of deviation. If, however, the portfolio is not rebalanced within the said 30 days, justification for not rebalancing will be placed before the Investment Committee of the AMC and effective steps would be taken as may be decided by the Investment Committee. At all points of time, the portfolio will be in line with the investment objective of the scheme.</p> <p>Investors may please note that any change in the asset allocation pattern, other than that envisaged above, and hence affecting the investment profile of the scheme, shall be construed as a change in fundamental attribute, and shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI Regulations.</p>		
Risk Profile of the Schemes	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>Interest Rate Risk: As with all debt and money market instruments, changes in interest rates will affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and decrease as interest rates rise.</p> <p>Liquidity or Marketability Risk: This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.</p> <p>Credit Risk: Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security).</p> <p>Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk refers to the fall in the rate for reinvestment of interim cash flows.</p> <p>(Risks associated with investing in unrated debt securities such as non-availability of third party assessment on the repaying capability of the issuer, etc.) (For Applicable Schemes)</p> <p>Risks associated with investment in Derivatives involve, liquidity risk, valuation risk, systemic risk etc.</p> <p>Schemes may invest in securitized debt such as asset backed securities (ABS) or mortgaged backed securities (MBS) which involves risk such as limited liquidity and price risk, limited recourse, delinquency and credit risk, etc.</p> <p>Risks associated with transaction in Units through Stock Exchange mechanism: Allotment and/or redemption of Units through NSE or BSE or any other recognized stock exchange on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing, settlement, etc., upon which the Scheme has no control. Moreover, transactions conducted through the stock exchange mechanism will be governed by the operating guidelines and directives issued by the relevant recognized stock exchange.</p> <p>Risks associated with segregated portfolio:</p> <p>Unit holders holding units of segregated portfolio may not be able to liquidate their holdings till recovery of money from the issuer. Security in the segregated portfolio may not realize any value. Listing of any units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.</p> <p>Risks associated with repo transactions in corporate debt (For Applicable Schemes)</p> <p>The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counter party failing to honour the repurchase agreement. However, in repo transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over collateralization (the value of the collateral being more than the repo amount).</p> <p>Risks associated with investment in securitized debt (For Applicable Schemes) :</p> <p>The Scheme may invest in securitized debt such as asset backed securities (ABS) or mortgaged backed securities (MBS) which involves risks such as limited liquidity and price risk, limited recourse, delinquency and credit risk etc.</p>	

	<p>Applicable to Baroda Conservative Hybrid Fund</p> <p>Risks associated with investing in equity and equity related securities</p> <p>Equity instruments carry both company specific and market risks and hence, no assurance of returns can be made in respect of these investments. Equity securities and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio. Also, the value of the Scheme's investment may be affected by fluctuations in the interest rates, currency exchange rates, changes in laws/policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors.</p> <p>Please refer SID for risks associated with investing in Foreign Securities and REITs and InvITs.</p>																																				
<p>Risk Mitigation/ Management Strategy</p>	<p>Investment in debt securities carries various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification.</p> <p>Applicable to Baroda Conservative Hybrid Fund</p> <p>Investments in debt, equity and equity related securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging. Further, the portfolio of the scheme will be constructed in accordance with the investment restrictions specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p>																																				
<p>Plan & Options</p>	<p>The Schemes will have two plans thereunder, viz. Plan A and Plan B (Direct) in case of all schemes except Baroda Ultra Short Duration Fund, Baroda Money Market Fund, Baroda Overnight Fund and Baroda Banking & PSU Bond Fund. <p>Investment Strategy</p>	<p>Baroda Ultra Short Duration Fund The Scheme is an open-ended ultra short term debt scheme that seeks to generate regular income by investing in a portfolio consisting of money market and debt instruments such that the Macaulay duration of the portfolio is between 3 months - 6 months, as defined below. Macaulay duration is the weighted average term to maturity of the cash flows from an instrument. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration is a measure of interest rate sensitivity of a fixed income instrument. Higher the Macaulay duration, higher would be the interest rate risk. Macaulay duration of a portfolio is the asset weighted average of the Macaulay duration of individual bonds / securities in the portfolio. The table below illustrates the calculation of Macaulay duration of the portfolio.</p> <table border="1" data-bbox="384 2398 1933 2603"> <thead> <tr> <th>Instrument</th> <th>Amount (Rs. in Crs.)</th> <th>% of Portfolio (a)</th> <th>Macaulay Duration (b)</th> <th>Weighted Average (a*b)</th> </tr> </thead> <tbody> <tr> <td>Instrument 1</td> <td>25</td> <td>25%</td> <td>1</td> <td>0.25</td> </tr> <tr> <td>Instrument 2</td> <td>25</td> <td>25%</td> <td>2</td> <td>0.50</td> </tr> <tr> <td>Instrument 3</td> <td>25</td> <td>25%</td> <td>3</td> <td>0.75</td> </tr> <tr> <td>Instrument 4</td> <td>25</td> <td>25%</td> <td>4</td> <td>1</td> </tr> <tr> <td></td> <td>100</td> <td>100%</td> <td>Macaulay Duration of Portfolio</td> <td>2.50</td> </tr> </tbody> </table> <p>Macaulay Duration - Calculation</p> $\text{Macaulay Duration} = \frac{\sum_{t=1}^n \frac{t \cdot C}{(1+y)^t} + \frac{n \cdot M}{(1+y)^n}}{\text{Current Bond Price}}$ <p>Where: t = respective time period C = periodic coupon payment y = periodic yield n = total number of periods M = maturity value Current Bond Price = Present value of cash flows</p>				Instrument	Amount (Rs. in Crs.)	% of Portfolio (a)	Macaulay Duration (b)	Weighted Average (a*b)	Instrument 1	25	25%	1	0.25	Instrument 2	25	25%	2	0.50	Instrument 3	25	25%	3	0.75	Instrument 4	25	25%	4	1		100	100%	Macaulay Duration of Portfolio	2.50

Key Assumptions

1. Macaulay duration measures interest rate risk accurately only for instruments where cash flows do not change with change in the yield (i.e. for plain vanilla instruments and not for instruments with embedded options).
2. Macaulay duration assumes yield curve is flat and so cash flows are reinvested at constant YTM rate over the instrument's period.
3. Macaulay duration does not consider the fact that duration does not remain constant and duration changes with level of YTM rates.

The key factors of the investment strategy of the Scheme are:

- a) Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
- b) The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities /instruments.
- c) Issuer/Companies, which meet the initial selection norms, are then evaluated on the financial norms for consideration in the investments. The Scheme would make investments universe based on the spread and liquidity, in such that the Macaulay duration of the portfolio of the Scheme will be between 3 to 6 months.
- d) The Scheme will emphasize on well managed, with above average growth prospects whose securities can be purchased at a good yield and whose debt securities will be mainly in securities listed as investments grade by a recognised authority like CRISIL, ICRA, CARE etc.
- e) Investment in sovereign papers would be based on the interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data, & trends in macro variables such as credit growth, liquidity, money supply, fiscal numbers & global interest.

Baroda Liquid Fund

The key factors of the investment strategy of the Scheme are:

1. Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
2. The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities/instruments.
3. Issuer/Companies, which meet the initial selection norms, are then evaluated on the financial norms for consideration in the investments. The Scheme will make investments universe based on the spread and liquidity, in such that the average maturity of the instruments in the Scheme will be in between one to three months.
4. The Scheme will emphasise on well managed, with above average growth prospects whose securities can be purchased at a good yield and whose debt securities will be mainly in securities listed as investments grade by a recognised authority like CRISIL, ICRA, CARE etc.
5. Investment in sovereign papers would be based on the interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data, & trends in macro variables such as credit growth, liquidity, money supply, fiscal numbers & global interest.

Baroda Treasury Advantage Fund

The Scheme is a low duration debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 6 months and 12 months, as defined below.

Macaulay duration is the weighted average term to maturity of the cash flows from an instrument. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration is a measure of interest rate sensitivity of a fixed income instrument. Higher the Macaulay duration, higher would be the interest rate risk.

Macaulay duration of a portfolio is the asset weighted average of the Macaulay duration of individual bonds / securities in the portfolio. The table below illustrates the calculation of Macaulay duration of the portfolio.

Instrument 3	25	25%	3	0.75
Instrument 4	25	25%	4	1
	100	100%	Macaulay Duration of Portfolio	2.50

Macaulay Duration - Calculation

$$\text{Macaulay Duration} = \frac{\sum_{t=1}^n \frac{t \cdot C}{(1+y)^t} + \frac{n \cdot M}{(1+y)^n}}{\text{Current Bond Price}}$$

Where:

- t = respective time period
- C = periodic coupon payment
- y = periodic yield
- n = total number of periods
- M = maturity value
- Current Bond Price = Present value of cash flows

Key Assumptions

1. Macaulay duration measures interest rate risk accurately only for instruments where cash flows do not change with change in the yield (i.e. for plain vanilla instruments and not for instruments with embedded options).
2. Macaulay duration assumes yield curve is flat and so cash flows are reinvested at constant YTM rate over the instrument's period.

Baroda Banking & PSU Bond Fund

The Scheme is an open-ended debt scheme that seeks to provide regular income through a portfolio of debt and money market instruments consisting predominantly of securities issued by entities such as Banks, Public Sector Undertakings (PSUs), Public Financial Institutions and Municipal Bonds..

The key factors of the investment strategy of the Scheme are:

- a) Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
- b) The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities /instruments.

The key factors of the investment strategy of the Scheme are :

1. Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
2. The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities/instruments.

5. Investment in sovereign papers would be based on the interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data, & trends in macro variables such as credit growth, liquidity, money supply, fiscal numbers & global interest.

Baroda Dynamic Bond Fund

The Scheme follows an active investment strategy structured in a manner that offers investors the benefit of a dynamic investment strategy through its duration management and asset allocation.

- The term "Dynamic" for the purpose of the Scheme may be defined as the flexibility to alter the duration of the portfolio, through the reallocation of its funds into different asset classes within fixed income, to allow investors to benefit from the prevailing interest rate scenario.

- The Scheme because of its wide spectrum investment strategy allows its portfolio manager to deliver optimized returns by taking active investment calls on duration and asset allocation. The portfolio of the Scheme functions dynamically based on two parameters – duration reset & asset class switch.

The table below explains the Scheme's active investment approach under different interest rate scenarios that could prevail in the market from time to time. Based on these two parameters, the portfolio manager would look to continuously capture positive price movements and try to minimize the impact of adverse asset prices.

Baroda Credit Risk Fund

The Scheme is an actively managed open-ended debt scheme that seeks to provide returns by investing in a portfolio consisting of money market and debt instruments, government securities and treasury bills.

The fund management team would formulate a view on the credit quality, interest rate movement etc., by monitoring parameters linked to corporate performance, economy as well as developments in the global markets. The Scheme may assume moderately higher credit risk as compared to a scheme investing predominantly in AAA bonds / sovereign securities. The portfolio will be constructed in line with the benchmark and it would be endeavored to actively manage the portfolio so that it is similar to various attributes of benchmark like average maturity, duration etc. Selective capital appreciation opportunities could be explored by extending credit and duration exposure above the benchmark. The key element of investment strategy is having the ability to analyze and price credit risk for short dated securities.

Baroda Money Market Fund

The Scheme is an open-ended debt scheme that seeks to generate regular income by investing in a portfolio consisting of money market instruments.

The key factors of the investment strategy of the Scheme are:

- Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
- The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities /instruments.
- Issuer/Companies, which meet the initial selection norms, are then evaluated on the financial norms for consideration in the investments.
- The Scheme will emphasize on well managed, with above average growth prospects whose securities can be purchased at a good yield and whose debt securities will be mainly in securities listed as investments grade by a recognised authority like CRISIL, ICRA, CARE etc.
- Investment in sovereign papers would be based on the interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data, & trends in macro variables such as credit growth, liquidity, money supply, fiscal numbers & global interest.

Baroda Overnight Fund

The Scheme is an open-ended debt scheme that seeks to generate regular income by investing in a portfolio consisting of overnight securities having maturity of one business day.

The key factors of the investment strategy of the Scheme are:

- Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
- The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities /instruments.
- Issuer/companies, which meet the initial selection norms, are then evaluated on the financial norms for consideration in the investments.
- The Scheme will emphasise on well managed, with above average growth prospects whose securities can be purchased at a good yield and whose debt securities will be mainly in securities listed as investments grade by a recognised authority like CRISIL, ICRA, CARE etc.
- Investment in sovereign papers would be based on the interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data, & trends in macro variables such as credit growth, liquidity, money supply, fiscal numbers & global interest.

Baroda Gilt Fund

The key factors of the investment strategy of the Scheme will be:

- The Scheme will predominantly invest in Central & State Government rated securities, as well as T-Bills.
- Investments made by the Scheme would be in accordance with the features of the Scheme and provisions of SEBI Regulations. A view on the movement of interest rates will be taken on an ongoing basis, considering the impact of the developments on the macro-economic front and the demand and supply of funds.

Baroda Short Term Bond Fund

The Scheme is a short term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 1 year and 3 years as defined below:

Macaulay duration is the weighted average term to maturity of the cash flows from an instrument. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration is a measure of interest rate sensitivity of a fixed income instrument. Higher the Macaulay duration, higher would be the interest rate risk.

Macaulay duration of a portfolio is the asset weighted average of the Macaulay duration of individual bonds / securities in the portfolio. The table below illustrates the calculation of Macaulay duration of the portfolio.

Instrument	Amount (Rs. in Crs.)	% of Portfolio (a)	Macaulay Duration (b)	Weighted Average (a*b)
Instrument 1	25	25%	1	0.25
Instrument 2	25	25%	2	0.50
Instrument 3	25	25%	3	0.75
Instrument 4	25	25%	4	1
	100	100%	Macaulay Duration of Portfolio	2.50

Macaulay Duration - Calculation

$$\text{Macaulay Duration} = \frac{\sum_{t=1}^n \frac{t \cdot C}{(1+y)^t} + \frac{n \cdot M}{(1+y)^n}}{\text{Current Bond Price}}$$

Where:

- t = respective time period
- C = periodic coupon payment
- y = periodic yield
- n = total number of periods
- M = maturity value
- Current Bond Price = Present value of cash flows

Key Assumptions

- Macaulay duration measures interest rate risk accurately only for instruments where cash flows do not change with change in the yield (i.e. for plain vanilla instruments and not for instruments with embedded options).
- Macaulay duration assumes yield curve is flat and so cash flows are reinvested at constant YTM rate over the instrument's period.
- Macaulay duration does not consider the fact that duration does not remain constant and duration changes with level of YTM rates.

The fund manager will adopt an active management style to optimize returns. The key factors of the investment strategy of the Scheme will be:

- Identifying attractive opportunities on the basis of the government policies, economic development, monetary policy, research report and overall economic conditions and development.
- The issuer/companies selection for investment exposure would be based on financial parameters such as fundamentals of business, quality of management, turnover, financial strength of the company and the key earnings drivers, net worth, Interest coverage ratio, profitability track record and the liquidity of the securities/instruments.
- Issuer/Companies, which meet the initial selection norms, are then evaluated on the financial norms for consideration in the investments. The scheme would make investments universe based on the spread and liquidity, such that the Macaulay duration of the portfolio of the scheme is between 1 year and 3 years.
- The Scheme will emphasise on well managed, with above average growth prospects whose securities can be purchased at a good yield and whose debt securities will be mainly in securities listed as investments grade by a recognised authority like CRISIL, ICRA, CARE etc.
- Investment in sovereign papers would be based on the interest rate expectations arising out of macroeconomic analysis. This includes analysis of inflation data, & trends in macro variables such as credit growth, liquidity, money supply, fiscal numbers and the global interest environments.
- The portfolio will be sufficiently diversified by investing in number of issuers/companies without any restriction of market capitalization across the industries so as to reduce the risk of a concentrated portfolio.

There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.

Prudential Limits in Sector and Group Exposure:

The AMC shall ensure that the total exposure of the scheme in a particular sector (excluding investments in Bank CDs, Tri-party repo, G-Secs, T-Bills short term deposits of Scheduled commercial banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) does not exceed 20% of the net assets of the scheme.

The scheme may have an additional exposure to financial services sector not exceeding 10% of the net assets of the scheme, by way of increase in exposure to Housing Finance Companies ("HFCs") only, subject to the condition that such securities issued by HFCs are rated AA and above and these HFCs are registered with National Housing Bank (NHB). However, the total investment in HFCs cannot exceed 20% of the net assets of the scheme. Further, an additional exposure of 5% of the net assets of the scheme may be invested in securitized debt instruments based on retail housing loan portfolio and/or affordable housing loan portfolio.

The total exposure in a particular group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme. Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Directors of the Trustee Company. Investment by the scheme in debt and money market instruments of group companies of both the Sponsor and the AMC shall not exceed 10% of the net assets of the scheme. Such investment limits may be extended to 15% of the net assets of the scheme with the prior approval of the Board of Trustee.

For this purpose, a group means a group as defined under regulation 2 (mm) of the SEBI (Mutual Funds) Regulations, 1996 and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

INSTRUCTIONS FOR FILLING UP THE APPLICATION FORM (CONTD.)

the state of Sikkim. Investors (being individuals) applying for Micro SIP registrations are exempt from mandatory requirement of PAN submission. Such set of customers, however, need to complete the necessary KYC requirements, and get a unique reference number from the KRA's system called PAN Exempt KYC Reference No. (PEKRN).

A copy of the KRA issuance letter containing PEKRN should be attached with each application/ transaction.

- In the event of any Application Form being subsequently rejected for mismatch of applicant's PAN details with the details on the website of the Income Tax Department, the investment transaction will be cancelled and the amount may be redeemed at the applicable NAV, subject to levy of exit load, if any. Please contact any of the Investor Service Centres / Registrar / Distributors or visit our website, www.barodamf.com, for further details.

2. KYC :

- To simplify KYC norms and make them more investor friendly and uniform across all intermediaries registered with SEBI, SEBI has recently laid down certain changes in the KYC process. The primary objective behind this is to eliminate duplication of KYC across intermediaries in the securities market. For this purpose, KYC registration is being centralized through KYC Registration Agencies ("KRA") registered with SEBI. Thus, each investor has to undergo a uniform KYC process only once in the securities market and the details would be shared with other intermediaries by the KRAs. Further, SEBI has mandated an In Person Verification ("IPV") of clients to be carried out as part of KYC. IPV shall be a one-time process, and once it is carried out by an intermediary, may be relied upon by other intermediaries also. For mutual funds, IPV may be carried out by the AMC or by the Registrar, or by Know Your Distributor ("KYD") compliant distributors who hold valid certifications issued by the National Institute of Securities Market ("NISM")/ Association of Mutual Funds in India ("AMFI") for their own clients or by Scheduled Commercial Banks (SCB).

- The following shall be applicable for investing in the Scheme under this KIM :

- For New Investors who are not KYC compliant under the erstwhile or new KYC norms:
 - KYC Application Form to be used, which is attached along with the application.
 - IPV/ Document verification to be done by the Registrar/AMC/KYD compliant distributors/SCBs.
 - Acknowledgement to be issued to the investor to facilitate subsequent investments from the investor.
 - KYC application and necessary documents should either come along with a financial transaction or when the account is opened. This is in line with demat and bank account opening process.
- For New Investors who have already done their KYC with any other SEBI registered intermediary under the new KYC norms: a. Such KYC compliant investors would not be required to do KYC again.
- For Existing Investors in the MF Industry: They will not be required to do KYC again.

- Investors who have completed their Centralised KYC (CKYC) and have obtained KYC Identification Number (KIN) from The Central Registry of Securitisation Asset Reconstruction and Security Interest of India (CERSAI) / Central KYC Records Registry (CKYCR), may quote their KIN while investing.

- KYC compliance with a KRA and enclosing the KYC Acknowledgement along with the Application Form are mandatory for all investors, including individuals, non-individuals, NRIs and channel investors, irrespective of the amount of application/value of transaction. Applicants applying for units through a PoA must ensure that the KYC Acknowledgement of both the issuer of the PoA and the holder of the PoA are enclosed along with the Application Form. The KYC Acknowledgement referred above will be issued by the KRA when an investor submits to the KRA, a KYC application and the prescribed documents. This KYC Acknowledgement is issued by the KRA as a token of having verified the identity and address of the investor(s) and for efficient retrieval of records.

- KYC status will be validated with the records of the KRA before allotting units. The Fund/AMC will not be held responsible and /or liable for rejection of KYC Form by the KRA/CERSAI. Where it is not possible to verify the KYC compliance status of the investor at the time of allotment of units, the Registrar/AMC/Trustee shall verify the KYC compliance status of the investor within a reasonable time after the allotment of units. In the event of non-compliance of KYC requirements, the Trustee / AMC reserves the right to freeze the folio of the investor(s) and effect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to levy of exit load, if any. In case of an investor applying for CKYC effective February 1, 2017, if there is a mismatch in the name appearing in the CKYC application form and the one mentioned in the Proof of Identity (POI) document, CERSAI will reject the CKYC application. Investors are, therefore, advised to ensure that their names appearing in the CKYC application form and in the POI document are same.

- Please note that you need to comply with the KYC requirements by submitting requisite documents to the Registrar/AMC/Fund or any SEBI registered KRA and attaching the KYC Acknowledgement with the Application Form. For more information, please log on to www.cvilindia.com / www.amfiindia.com, before investing.

Applications are liable to be rejected if KYC requirements are not complied with by all the applicants, and if KYC acknowledgement is not enclosed with the Application Form.

Please note that KYC applicability norms for various investor categories may change anytime in future. Hence, with a view to avoiding rejections, investors are requested to apprise themselves about KYC applicability before submitting their transactions.

V. INTIMATION TO INVESTORS :

Please note the following with respect to intimation to investors / unit holders regarding change of any request/ rejection of such request:

- For any change or rejection of any request such as bank mandate, address etc., you may be intimated by way of letters or, if registered with the AMC/Fund, by way of emails and/or SMS.

In order to safeguard the interests of applicants and avoid fraudulent transactions in any other name, the Fund does not generally accept Third Party Payments. The first applicant has to be one of the joint holders of the bank account from which the payment is made via cheque/Funds transfer/RTGS/NEFT. Therefore, please mention the bank account number, bank name & branch address from where the payment is issued and ensure that they match with details on the payment instrument, where applicable.

- Where the payment instrument does not mention the bank account holder's name(s), please attach bank pass book copy/bank statement (showing the account number, account holder's name and address)/bank letter (mentioning details like bank account number, branch address, account type etc.), with a view to substantiating that the first applicant is one of the joint holders of the bank account concerned.

- In case of RTGS, NEFT, ECS, bank transfer etc., please submit an acknowledged copy of the instruction to the bank stating the account number to be debited.

- In specific and exceptional situations where Third Party payments are permitted, such as (i) payment by parents / grand parents / related persons* on behalf of a minor (other than by a registered guardian) in consideration of natural love and affection or as gift for value not exceeding ₹ 50,000 for each purchase or (ii) payment by a custodian on behalf of an FII or a client, and (iii) payment by an employer on behalf of employees, KYC of the investor and KYC of the person making the payment are both mandatory, irrespective of the amount. Additionally, a joint declaration is also required to be submitted. *'Related Person' means any person investing on behalf of a minor in consideration of natural love and affection or as a gift.

- The AMC reserves the right to reject the Application Form, or call for additional details, if the payment bank account and other details are not mentioned on the Application Form and/or do not match with the payment instrument and/or necessary documents and declaration, as applicable to respective investors and transactions, are not attached or are insufficient. In case the funds are transferred to the Scheme account prior to the rejection of the Application Form, the amount transferred may not be refunded or redeemed unless the investor establishes KYC with additional documentation.

- Investors are advised to visit www.barodamf.com for more details, including the formats.

- Please note that:

- Regular Plan** is meant for investors who route their investments through distributors only.

- Direct Plan** is meant for direct investments, i.e. for investors who purchase/subscribe to the units of the Scheme directly with the Fund, and is not available for investors who route their investments through a Distributor.

Both Plans will have a common portfolio, but Direct Plan will have a lower expense on account of absence of brokerage and commission. Hence both plans will have distinct NAVs.
