Market Outlook - Equity

Stock markets have remained volatile, with the Nifty declining by 6% in the month of Feb 2025, underperforming some developed markets like the US S&P 500 -1.4% and Nasdaq -3.9%. Furthermore, India also underperformed emerging markets, which rose 5% in the same period. Despite recent underperformance, India's long-term performance over the past decade has been strong, with a CAGR of 12% compared to the MSCI Emerging Markets' 4%.

Nifty Small Cap 250 Index fell by 13% and Nifty Midcap 150 Index by 11% over the Feb month 2025. Sector-wise, most sectors ended in the red. Notable declines was witnessed in FMCG (10.9%) Realty (13.4%), Capital goods (14.4%), IT (12.5%), Oil and gas and PSU Banks (13.5%), Pharma (7%), and Metal (3%). Private banks were relatively resilient. Nifty index have corrected by 14 % over the last six months; Small Cap 250 Index down by 25%; Nifty 100 down 16% and Nifty Midcap down 20%.

Trump policies on tariff weighed on investor sentiments through the month. Globally, trade tensions persist, with the US imposing tariffs on several countries and considering reciprocal tariffs on India and China. The US trade deficit with India is significantly lower than with China, making the situation a "wait and watch" scenario. Dollar index (DXY) depreciated during the month, however, continues to be at elevated levels of 107.

Consequently, Foreign Portfolio Investor (FPI) flows have experienced their second consecutive month of outflows, with January seeing an outflow of approximately USD12.4 bn and February witnessing around USD2.3 bn, totalling about USD11.4 bn in 2025. This follows a net outflow of USD 0.8 bn in 2024. Notably, this trend is not unique to India, as other emerging markets like Brazil, Thailand, and Vietnam have also faced outflows, though India's were significantly higher. Domestic flows, however, remain strong, with the last two months' Domestic institutional investor (DII) flows reaching USD 17.5 bn.

Recent U.S. economic indicators have fallen short of expectations; US S&P Global Flash Composite PMI experienced a significant decline, dropping to 50.4 in February from 52.7 in January. While the S&P Global Flash Manufacturing PMI increased to 51.6, up from 51.2, while the S&P Global Flash Services PMI fell sharply to 49.7, down from 52.9, which is negative for US. This situation has intensified pressure on the market. Additionally, existing home sales in the US decreased by 4.9% in January, reaching a seasonally adjusted annualized rate of 4.08 million, compared to a smaller decline of 2.9% in December.

In India, recent high-frequency data indicates an urban economic slowdown as reflected by decline in housing sales. However, optimism arises from the Union Budget's announcement of a personal income tax cut worth Rs1 trillion for FY26, which could boost urban consumption. Additionally, easing inflation provides the Reserve Bank of India (RBI) flexibility to continue reducing repo rates in FY26, further supporting recovery.

Meanwhile, India's Q3FY25 GDP growth rebounded to 6.2% YoY, up from 5.4% in Q2FY25. Amongst high frequency indicators, inflation (CPI) eased to 4.3% in January vs 5.2% in Dec 2024; Industrial Production (IIP) slowed to 3.2% in Dec 2024.

Earnings season just concluded. 3Q FY25 Earnings for Nifty 500 Companies witnessed some uptick in earnings with YoY growth of 8% as compared to the previous two quarters with Earnings growth of 4% in 1Q FY25 and -1% in 2Q FY25. Amongst these large cap companies reported 7% growth, midcap companies grew earnings by 27%, while small cap companies earnings declined by 2% YoY. Key sectors driving growth included BFSI, IT, telecom, healthcare, and capital goods.

Looking ahead, earnings growth expectations are set at 15% for the next two years, with consumption recovery, monsoons, and capex spending being crucial factors to watch. Sectors like cement, capital goods, metals, telecom, and financials are poised for strong growth, while IT is expected to maintain steady growth.

In January 2025, India's consumer sentiment improved, with the Index of Consumer Sentiments (ICS) rising by 1.1%. Both urban and rural areas saw gains, with rural areas experiencing a stronger recovery due to increased optimism about current and future economic conditions. Domestic demand is likely to improve led by lower food inflation, 25bps rate cut by RBI and higher liquidity infusion, personal tax cuts and continued focus on capex in select sectors.

The Indian equity markets faced a turbulent month, with heightened volatility and geopolitical concerns impacting global sentiment. The continued correction since mid-September 2024 has pushed Nifty-50 valuations below the 10-year average of 20x one-year forward P/E. Policy measures by the Government of India and the RBI offer hope for a consumption-driven recovery in FY26F, though global policies and currency fluctuations remain risks. Softer crude oil prices and global geopolitical stability (assuming resolution of the Russia-Ukraine conflict) augurs well for Emerging Markets(EM) in general and India in particular.

Market Outlook - Fixed Income

Global Economy -

The Global dynamics is filled with uncertainty and markets are dancing on the edge. Looking carefully, the fundamentals have improved since 2022, be it inflation which has come down for major economies as well as growth has found a stable ground, but still the markets are repricing especially Emerging Market Economies (EMEs) are witnessing selling pressures from foreign portfolio investors and currency depreciation. All the hysteria stems out from recent US tariffs and trade policy. A US first approach has set a changing dynamic between US and countries, even the closet allies for years are facing the heat.

The immediate reaction of current geopolitical tensions has been visible in currency markets with dollar index strength leading to depreciation of emerging market currencies. Overall global yields remained attuned to movement in US treasury yields.

Source: Bloomberg, Data is for Jan-25 (Latest available)

Another key development globally was visible in inflation numbers. Japan's inflation climbed to 4% y/y in Jan-2025. Whereas US inflation remained at 3% with sticky core. Along with US, eurozone inflation is also seeming to inch up with Germany at 4% in Jan-25, highest since Aug-23. The divergent macroeconomic conditions are reflected in monetary policy actions across countries. With US keeping its policy rate unchanged, Japan, however, hiked its policy rate by 25 bps.

Source: Bloomberg, Data as on Feb-2025

The commodities have an interesting twist. Gold prices have been trading at its all time high in Feb-2025, trading as high as 2950\$/ounce. The interesting part is that historically rise of both gold and dollar index is an unlikely event. Historically, gold has shown a negative correlation with the dollar, except for a few instances such as during the Russia Ukraine war. The gold market has undergone fundamental changes over the last few years, ultimately leading to one of the biggest rises in prices in the last decade. On the contrary, Brent prices continued to remain range bound hovering around 72-75\$/bl.

China's economic policies have been in light to support its ailing economy. Last two years China's Government and Central Bank have laid out supportive measures with loose monetary and fiscal policies. The fiscal and monetary impetus can reflect in growth recovery and should be a key watch.

Domestic Economy -

The Indian economy is regaining its growth momentum driven by recovery in consumption demand and overall investment. The Q3 FY25 numbers reflected India's GDP growth to have bottomed out and has seen modest improvement relatively

to Q2 FY25. Real GDP growth in Q3 FY25 stood at 6.2% y/y. Nominal GDP growth stood at 9.9% y/y. More importantly the future trajectory has seen some positive revisions. The second advanced estimates have projected FY25 GDP growth at 6.5% y/y better than first advance estimates of 6.4% y/y. This implies that the worst of India's growth reflected in Q2 FY25 is behind us.

Source: Bloomberg, Data as on Feb-25

RBI Monetary Policy Committee (MPC) after a span of 5 years unanimously delivered a rate cut of 25bps. Economic Growth to have taken precedence over inflation. Currency concerns were evident in this monetary policy. RBI's commitment to provide sufficient liquidity to the banking system was reiterated and was encouraging.

Source: Morgan Stanley, Jan-25 (Latest available data)

High frequency indicators suggest that demand economy is recovering from the slowdown witnessed in H1 FY25. E-way bills growth accelerated to 23.1% in Jan-25. The two-wheeler segment saw a recovery, primarily driven by a surge in scooter sales. Tractor sales recorded double digit growth for the second consecutive month.

India's Manufacturing Purchasing Managers Index registered 56.3 in Feb-25, down from 57.7 in Jan-25 but still indicative of a further robust improvement in the health of the manufacturing sector. The survey highlighted new export orders rose strongly in Feb-25, as manufacturers continued to capitalise on robust global demand for their goods

On the fiscal front, fiscal deficit touched 76% of Budget estimates. Income tax remains strong at 22% y/y on YTD basis. Indirect taxes including GST collections grew by 9% y/y in line with budget estimates.

Domestic Inflation -

- Headline inflation has softened to 4.3% in January-25 led by favourable base effect and sharper decline in vegetable prices.
- The estimate for Feb-25 inflation is tracking around 4.1%, after account for continued decline in food prices.
- The daily food price data by department of consumer affairs indicates further decline in vegetable prices in February-25 led by improving supplies and seasonal winter crop arrival.

Domestic Liquidity -

Source: Bloomberg, Data as on 28.02.2025

- Liquidity continued to remain in the deficit zone, but the tightness eased driven by Cash reserve ratio (CRR) drawdown, Open market operations (OMO) purchases and RBI's Forex (FX) swap auctions.
- Following the liquidity conditions, overnight rates declined to 6.2%.
- The year-end government spending is expected to offset the tightness by end-March.
- Any forex intervention remains a risk to our expectations.

Fixed Income Outlook -

- Global monetary policy dynamics have started witnessing bumps in their path to recalibrate the monetary rates.
- US Fed's shift in the forward guidance and the recent pickup in inflation must be carefully monitored.
- Trump's tariff threats and spillovers on currencies is the existing risk that is driving the markets volatile.
- Going forward RBI may remain pro-growth especially as inflation aligns with the targeted levels.
- RBI has been and is expected to continue infusing liquidity through OMO, FX swap in essence of the monetary policy stance.
- Irrespective of the tools, liquidity measures are expected to have an impact on the short end of the curve.
- The spreads on the short end are already elevated and attractive and a rate cut going forward may compress the current spreads.
- Having said that, the fundamentals of India's fiscal demand supply remain balanced and that is expected to maintain a downside bias on yields.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that “companies create wealth and not markets” and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management - Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with **superior** and **sustainable** earnings growth with **strong management**, at **reasonable valuations**.

MANAGEMENT

Leadership in:

- **Competency** basis management through market cycles (trend of sales, margins, capital allocation, etc.)
- **Corporate Governance** factors such as interest alignment with minority shareholders, Conduct and govern business with Transparency, Ethics and Accountability, organization structure, track record with respect to all shareholders

BUSINESS

Growth:

- Company growing faster than industry, industry growing faster than market
- Structural and long-term sustainable growth
- Focused and simple to understand
Moat: a sustainable competitive advantage arising from brand franchise, cost advantage, industry structure, technology/patents, distribution, etc.
Change: Positive change in sector, receding competitive intensity

VALUATION

- **Cash flow** is central to the way we think about a company's value
- **Valuations:** Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield, Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the **margin of safety** required
- Superior **risk-reward** profile

^A sustainable competitive advantage

1-Year median Marginal Cost of funds-based Lending Rate (MCLR) increased to 9.05% in Feb-25 from 9% in Jan-25, similar levels were last seen during demonetisation.

India's Manufacturing purchasing managers index survey highlighted new export orders rose strongly in Feb-25, as manufacturers continued to capitalise on robust global demand.

India's merchandise exports declined by 2.4% y/y led by lower oil exports and lower engineering goods exports..

Indirect tax collections accelerated in Jan-25, led by robust GST collections. The GST collection remains in line with budget estimates.

Data is as on month-on-month basis

Relatively High: Class III (Any MD)		B-III	

MD=Macaulay Duration, CRV=Credit Risk Value.

* The PRC matrix denotes the maximum risk that the respective Scheme can take i.e. maximum interest rate risk (measured by MD of the Scheme) and maximum credit risk (measured by CRV of the Scheme)

** CARE's fund quality rating is not a recommendation to purchase, sell, or hold a security/ fund. It neither commentson the current market price, suitability for a particular investor nor on the prospective performance of the fund with respect to appreciation, volatility of net asset value (NAV), or yield of the fund. The ratings do not address the funds ability to meet the payment obligations to the investors

Baroda BNP Paribas Credit Risk Fund

((Scheme has two*** segregated portfolios) An open-ended debt scheme predominantly investing in AA and below rated corporate bonds (excluding AA+ rated corporate bonds). A Relatively High Interest Rate Risk and Relatively High Credit Risk)

<p>This product is suitable for investors who are seeking*:</p> <ul style="list-style-type: none"> Income over medium term. Investment in a mix of debt and money market instruments across the credit and maturity spectrum. <p>*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.</p>	<p>Scheme Riskometer^^</p> <p>Investors understand that their principal will be at Moderately High risk</p>	<p>Benchmark (Tier 1) Riskometer^</p> <p>Benchmark riskometer is at Moderately High risk</p>
	<p>^^Riskometer For Scheme: basis it's portfolio, ^Riskometer For Benchmark (CRISIL Credit Risk Debt B-II Index): basis it's constituents; as on February 28, 2025</p>	

INVESTMENT OBJECTIVE

The primary objective of the Scheme is to generate returns by investing in debt and money market instruments across the credit spectrum. However, there can be no assurance that the investment objectives of the Scheme will be realized. The Scheme does not guarantee/indicate any returns.

Note on Segregated Portfolio: Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular-Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had led a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

Baroda BNP Paribas Corporate Bond Fund

(An Open ended Debt Scheme predominantly investing in AA+ and above rated corporate bonds. A relatively high interest rate risk and moderate credit risk scheme)

This product is suitable for investors who are seeking*:

- Capital appreciation and regular income in long term.
- Investment primarily in AA+ and above rated corporate bonds and the rest in debt and money market instruments.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Scheme Riskometer^^

Investors understand that their principal will be at Moderate risk

Past performance may or may not be sustained in future and is not a guarantee of future returns and should not be used as a basis of comparison with other investments. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown.

*% CAGR Returns are computed after accounting for the cash flow by using the XIRR method.

For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to page no. 53. Please note TRI indicates Total Return Index.

Performance of Schemes

(as on February 28, 2025)

Returns in INR represents the value of Rs. 10,000 invested at the beginning of 1 year, 3 years, 5 years and since inception.

Past performance may or may not be sustained in future and is not a guarantee of future returns and should not be used as a basis of comparison with other investments. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure.

Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas Dividend Yield Fund, Baroda BNP Paribas Nifty 200 Momentum 30 Index Fund, Baroda BNP Paribas Nifty Midcap 150 Index Fund & Baroda BNP Paribas Children's Fund is not provided as the scheme has not completed 6 months.

¹ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -21.82%.

² Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -2.24%.

³ The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous NAV history available for this plan prior to May 10, 2010, the point to point return from since inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception.

⁴ The scheme is a 'Transferee Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered.

⁵ Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively.

⁶ **Total Return Index:** Total Return Index: The total return index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index. Looking at an index's total return displays a more accurate representation of the index's performance. By assuming dividends are reinvested, you effectively account for stocks in an index that do not issue dividends and instead, reinvest their earnings within the underlying company. For example, an investment may show an annual yield of 4% along with an increase in share price of 6%. While the yield is only a partial reflection of the growth experienced, the total return includes both yields and the increased value of the shares to show a growth of 10%.

Difference between total return index & price index: A total return index (TRI) is different from a price index. A price index only considers price movements (capital gains or losses) of the securities that make up the index, while a total return index includes dividends, interest, rights offerings and other distributions realized over a given period of time.

⁷ The scheme has been in existence since September 23, 2004. The performance given above is the blended performance of erstwhile BNP Paribas Large Cap Fund and erstwhile Baroda Large Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda Infrastructure Fund to convert it to Baroda Large Cap Fund.

⁸ The scheme has been in existence since May 02, 2003. The performance given above is the blended performance of erstwhile BNP Paribas Mid cap Fund and erstwhile Baroda Mid cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda PSU Equity Fund to convert it to Baroda Mid Cap Fund.

For fund manager and managing since details, kindly refer page 57.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit, except for Baroda BNP Paribas Liquid Fund where the face value is ₹ 1,000 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website <https://www.amfiindia.com/research-information/other-data> and <https://www.amfiindia.com/importantupdates>.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem the fund at ₹ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage Change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme. These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link <https://www.barodabnpbaribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes> on website of mutual fund.

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	
Currency in circulation (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector
M3 (% YoY)	Measures money supply and is linked to real GDP growth and inflation
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects) and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in economy, industry's demand for credit and services' sector demand for credit respectively.
Personal credit (%YoY)	
Credit to industry (%YoY)	
Credit to services (%YoY)	
Deposit growth (%YoY)	Measures total deposit growth in the banking system
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope for transmission of rate cuts.
10 year G-Sec yields (%)	G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec yields are determinant of the government's ability to service its debt.
Weighted average lending rate of Banks (%)	Lending rate for all loans
Weighted average deposit rate of banks (%)	Cost of deposits for banks
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Industry	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
IIP (%YoY)	
Mining (% YoY)	
Manufacturing (%YoY)	
Electricity (%YoY)	
Capital goods production (%YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable output particularly FMCG products.
Consumer durable production (% YoY)	
Consumer non-durable production (% YoY)	
PMI Manufacturing Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on order book, prices, employment etc.
PMI Services Index	
PMI Composite Index	
Consumer	
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume
Motorvehicle sales (%YoY)	
Passenger Vehicle (% YoY)	
Commercial Vehicle (% YoY)	
Two wheeler (% YoY)	
Tractor sales	
Petrol consumption (% YoY)	Measures volume of motor spirit consumption
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication component of GDP.
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport storage and communication component of GDP.
Freight	
Major port tariffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country
Foreign Trade	
Export growth (% YoY)	Measures value of exports
Import growth (% YoY)	Measures value of imports
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.
Fiscal	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence and other services component of GDP.
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.
Inflation	
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is
Core CPI (%YoY)	consumer price inflation excluding food and fuel.
WPI (%YoY)
